This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

REPORT.

TO THE RIGHT HON.

LORD BALFOUR OF BURLEIGH, K.T.,

His Majesty's Secretary for Scotland.

GENERAL REGISTRY OFFICE OF BIRTHS, ETC.,

EDINBURGH, *26th September*, 1901.

MY LORD,

I had the honour in 1900, in conformity with the requirements of the seventh section of the Scottish Registration Act, 17 and 18 Vict., cap. 80, to transmit to your Lordship, as Her late Majesty's Secretary for Scotland, General Abstracts of the Births, Deaths, and Marriages registered in Scotland during the year 1899, along with the usual Explanation and Commentary.

At the same time my Thirty-fifth Annual Report on Vaccination was transmitted, in accordance with the nineteenth section of the Scottish Vaccination Act, 26 and 27 Vict., cap. 108.

I have now the honour to transmit the Detailed Annual Report, together with the relative Tables, regarding the Births, Deaths, and Marriages registered in Scotland during the same year (1899).

I have the honour to be,

MY LORD,

Your most obedient Servant.

STAIR AGNEW,

Registrar-General.

REPORT TO THE REGISTRAR-GENERAL,

BY R. J. BLAIR-CUNYNGHAME, M.D., F.R.S.E.

SIR,

On the 31st of March a census of the population of Scotland was taken, and from the Summaries which were prepared by the Registrars throughout the country, obtained from the figures in the enumeration books as returned to them, we are able to give the populations estimated to the middle of the year calculated upon the numbers as ascertained at the censuses 1891 and 1901. The numbers now made use of from the latter

TABLE I.—Population estimated to the middle of each year; with the Number of Births, Deaths, and Marriages registered in Scotland during each of the Years 1855 to 1899, and their Proportion to the Population; also the Excess of Births over Deaths, the Illegitimate Births, and their Proportion to the Total Births.

YEARS	Estimated Population.	BIRTHS.		Deaths.	Marriages.	Excess of Births over Deaths.	Percentage to Population.			Percent. of Illegit. to Total Births.
		Total.	Illegit.				Births.	Deaths.	Marriages.	
1855	2,978.065	93,349	7,357	62,004	19,680	31,345	3·1491	2·0820	0·6608	7·88
1856	2,995,771	101,821	8,695	58,529	20,740	43,292	3·3988	1·9537	0·6923	8·54

Principal Towns above 25,000 inhabitants. Large Towns above 10,000 and under 25,000 inhabitants. The Small Towns from 3000 to 10,000 inhabitants from 1855 to 1881, but from 1881 onwards the Small Towns have from 2000 to 10,000 of population.

Digitized by Google

this Report. The correct and revised numbers can only be obtained after careful and laborious extraction by the census staff from the very numerous enumeration books.

The total population of Scotland as estimated to the 30th June 1899, is 4,390,448, the males numbering 2,130,938, the females 2,259,510.

This population as shown in Table II. is, as is usually done, primarily distributed into five groups of Registration Districts. In the Principal Town Districts the gross population is 1,801,122, the males being 862,469, the females 938,653; in the Large Town Districts the total is 578,705—males 284,585, females 294,120; in the Small Town Districts both sexes amount to 928,959, the males being 452,501, the females 476,458; in the Mainland Rural Districts they are 960,676—males 474,100, females 486,576; and in the Insular Rural Districts the total population is 120,986, the males numbering 57,283, the females 63,703.

By means of the recent census numbers some of the Tables have been

recalculated backwards from the numbers of 1901 and 1891, in place of forwards from those of 1881 and 1891, and no doubt are more correct than was the case at least during the later years of the past decennium.

BIRTHS.

130,733 births were registered throughout Scotland during 1899, a smaller number by 128 than for the previous year, and giving a birth-rate of 2·98 per cent., or 298 births in every ten thousand of the population, and which is the lowest rate as yet recorded since the commencement of these reports. The mean birth-rate for the last ten years is 3·03 per cent.

The male births during the year number 66,778, and the female 63,955. The births are in excess of the deaths by 51,140.

The number of illegitimate births is 8486, and constitute 6·49 per cent. of the total registered births—the lowest rate that has yet been noted in these reports. The male illegitimates are 4272, the female 4214.

Tables VIII. and IX. indicate how the births are distributed in each of the five primary Registration Districts:—In the Principal Town Districts they total to 56,590,—of those 28,876 being males and 27,714 females, together giving a birth-rate of 3·142 per cent.; in the Large Town Districts they are 18,419,—males 9447, females 8972, and constitute a birth-rate of 3·183 per cent.; in the Small Town Districts they are 28,178,—males 14,290, females 13,888, giving a birth-rate of 3·033 per cent.; in the Mainland Rural Districts they number 24,943,—males 12,826, females 12.117, with a birth-rate of 2·596 per cent.; and in the Insular Rural Districts they are 2,603,—the males 1339, the females 1264, together giving a birth-rate of 2·151 per cent. to the population of the same.

As regards the illegitimate births alone, these Tables also show how they are registered in the various districts. In the Principal Town Districts they number 3499,—males 1752, females 1747,—and form 6·18 per cent. of the total births in the same; in the Large Town Districts they are 929, —males 463, females 466,—and form 5·04 per cent. of all; in the Small Town Districts they are 1697,—males 851, females 846,—and form 6·02

TABLE V.—Number of Births, Deaths, and Marriages in the Principal Towns of Scotland during 1899, and their Proportion to the Estimated Population; also the Illegitimate Births, and their Proportion to the Total Births.

per cent. of the whole; in the Mainland Rural Districts they are 2219,—males 1129, females 1090,—together 8·90 per cent. of all; and in the Insular Rural Districts they are 142,—males 77, females 65,—and equal to 5·46 per cent. of all: the rate for Scotland as already mentioned is 6·49 per cent. of the total births. In other words, 1 child in every 15 was born out

TABLE VI.—Number of Births, Deaths, and Marriages in 1899, and their Proportion to the Population, estimated to the middle of the year, in Scotland, its Groups of Districts, its Divisions and Counties; also the Number of Illegitimate Births, and their Proportion to the Total Births.

Divisions and Counties.	Population Estimated to middle of the Year 1899.	Total Births.		Illegit. Births.		Deaths.		Marriages.

of wedlock in Scotland during the year; in the Principal Town Districts it was 1 in every 16; in the Large Town Districts 1 in every 20; in the Small Town Districts 1 in every 17; in the Mainland Rural Districts 1 in every 11; and in the Insular Rural Districts it was 1 in every 18.

Table V. gives similar information regarding the Principal Towns in Scotland. Thus the highest birth-rate occurred in Coatbridge—3·665 per cent., followed by Govan and Partick with one of 3·602 per cent., Glasgow with one of 3·267 per cent., Paisley with one of 3·199 per cent., Aberdeen with one of 3·185 per cent., Leith and Kilmarnock each with one of 3·165 per cent., Greenock with one of 3·101 per cent., Dundee with one of 2·982 per cent., Edinburgh with one of 2·690 per cent., and Perth with one of 2·650 per cent. As regards the illegitimate births in the same towns 8·16 per cent. of the total births in Dundee were of this character, 7·42 per cent.

TABLE VII.—Births in Scotland, 1855–1899; with the Proportion of Males to Females in the Legitimate, Illegitimate, and Total Births; also the Number of Twin and Triplet Births during each year; and the Proportion of Mothers who had Multiple Births.

in Aberdeen, 6·82 per cent. in Edinburgh, 6·77 per cent. in Perth, 6·48 per cent. in Glasgow, 4·79 per cent. in Greenock, 4·58 per cent. in Kilmarnock, 4·55 per cent. in Paisley, 4·13 per cent. in Leith, 3·70 per cent. in Govan and Partick, and 3·44 per cent. in Coatbridge.

Table VI. shows the illegitimate birth-rate in the divisions and counties of Scotland. In the latter the highest rate falls to Wigtown, where 14·69 per cent. of all were of this nature; the lowest rate, 2·95 per cent., occurred in Dumbarton. The counties in which the highest rate is found on this occasion are—Dumfries with 11·02 per cent.; Caithness with 11·15 per cent.; Aberdeen with 11·29 per cent.; Kirkcudbright with 11·95 per cent.; Elgin with 12·77 per cent.; Banff with 13·57 per cent.; and Wigtown with 14·69 per cent. In eighteen counties the rate is under that for Scotland, which is 6·49 per cent. The lowest rate occurs in Renfrew, 4·14 per cent.; Clackmannan 3·31 per cent.; Shetland 3·01 per cent.; and Dumbarton 2·95 per cent.

Of the total births registered throughout Scotland during the year 66,778 are of the male sex and 63,955 of the female, so that there were 2823 more of the former born than of the latter. The proportion of males born to females is as 104·4 is to 100. Among the legitimate births alone it is as 104·6 is to 100, and among the illegitimate as 101·4 is to 100.

During the year 1463 mothers bore twins and in 15 cases triplets, so that of the total mothers bearing children—129,240 in all—one in every 87 bore two at a birth, and one in every 8616 bore three.

TABLE VIII.—Births, 1899. Number of Legitimate, Illegitimate, and Total Births in Scotland, and its Five Groups of Districts, distinguishing the Sexes. Also the number of Twin and Triplet Births.

The births were registered throughout Scotland month by month as follows:—9·49 per cent. of them during May, 8·69 per cent. during June, 8·62 per cent. during October, 8·59 per cent. during April, 8·57 per cent. during July, 8·46 per cent. during August, 8·34 per cent. during March, 8·18 per cent. during September, 8·15 per cent. during January, 7·89 per cent. during November, 7·85 per cent. during December, and 7·17 per cent. during February.

The birth-rate for each ten thousand of the population as estimated for the present year in the following European States is—390 in Hungary, 371 in Austria, 364 in Prussia, 359 in German Empire, 342 in Italy, 320 in the Netherlands, 309 in Norway, 301 in Denmark, 289 in Switzerland, 288 in Belgium, 262 in Sweden, and 219 in France.

MARRIAGES.

During 1899 the number of marriages registered in Scotland was 32,978, giving a marriage rate of 75·11 in every ten thousand of the population, and which is the highest rate as yet reported. The mean average rate for the last ten years (1889-1898) is 70 per ten thousand.

Table VI. gives an indication as to the varying rate of marriage in the districts and counties into which Scotland is divided. As to the former, the rate in the Principal Town Districts is equivalent to 93·49 per ten thousand of the population of the same; in the Large Town Districts it is 76·29 in like proportion; in the Small Town Districts it is 67·79; in the Mainland Rural Districts it is 51·48; and in the Insular Rural Districts 39·76 per ten thousand.

In the counties the rate also greatly varies, attaining its maximum of 89·69 per ten thousand of the inhabitants of Edinburgh, the minimum of 38·37 being in Argyll. In four counties the marriage rate is above that for Scotland, which is 75·11 per ten thousand, viz.:—76·02 in Aberdeen; 76·38 in Forfar; 89·48 in Lanark; and 89·67 in Edinburgh. The rate is at its lowest in Orkney, 56·54; in Ross and Cromarty, 45·55; in Shetland, 45·26; in Sutherland, 41·64; and in Argyll, 38·37.

Table V. gives the number of marriages and the proportion corresponding thereto in each of the Principal Towns of Scotland, the latter being in

Glasgow a rate of 100 in each ten thousand of the population; in Edinburgh of 99, in Dundee of 85, in Aberdeen of 96, in Govan and Partick of 68, in Leith of 81, in Paisley of 80, in Greenock of 82, in Coatbridge of 83, in Perth of 97, and in Kilmarnock of 94.

The fertility of each marriage is computed as usual—the legitimate births of the year under review being divided by the marriages of a former year—on this occasion 1893; so that $\frac{122,247}{27,145}$ gives 4·50 as the average fertility of each marriage, or 450 children were presumably born to every 100 marriages.

From Tables X., XI., and XII. information may be obtained regarding the number and proportion of marriages as performed in Scotland and

over of the marriage ceremonies were performed under the auspices of the Established Church, the highest rates being 60·00 per cent. in Kinross, 60·40 per cent. in Linlithgow, 60·81 per cent. in Peebles, 62·78 per cent. in Clackmannan, 65·29 per cent. in Dumfries, 68·00 per cent. in Wigtown, 69·56 per cent. in Haddington, 72·64 per cent. in Kincardine, 72·66 per cent. in Shetland, and 75·78 per cent. in Kirkcudbright; the lowest being 34·61 per cent. in Lanark, 25·56 per cent. in Sutherland, and 16·86 per cent. in Ross and Cromarty. In two counties 50·00 per cent. or over of the marriage ceremonies were solemnized by ministers of the Free Church, 71·11 per cent. in Sutherland, and 76·29 per cent. in Ross and Cromarty; they are lowest in Clackmannan, 11·67 per cent., Shetland, 9·37 per cent., and Kirkcudbright, 8·52 per cent. Marriages in connection with the United Presbyterian Church occur in largest ratio in Berwick, where 21·11 per cent. of all fall under this demonination, Kinross with 25·00 per cent., Selkirk with 27·50 per cent., and Orkney with 31·10 per cent.; they are least in evidence in Argyll, 2·93 per cent., Caithness, 2·38 per cent., Ross and Cromarty, 1·71 per cent., and Inverness, 0·71 per cent; there being none in Sutherland. The counties in which Roman Catholic marriages bulk most largely are Lanark, where 16·98 per cent. of all pertain to this Church, Renfrew with 19·43 per cent., and Dumbarton, with 20·15 per cent.; least so in Aberdeen, with 1·22 per cent., Elgin, with 1·09 per cent., Shetland, with 0·78 per cent., and Berwick, 0·56 per cent. There are none in Orkney, Caithness, Sutherland, Ross and Cromarty, Kincardine, and Kinross. Episcopal Church marriages are proportionately most frequent in Kincardine, where 5·97 per cent. of all are so headed, in Edinburgh 6·09 per cent., and in Forfar 6·85 per cent.; least so in Shetland, 0·78 per cent.; Orkney, 0·61 per cent.; Caithness, 0·59 per cent.; Wigtown, 0·57 per

cent; and Kirkcudbright, 0·45 per cent.; there being none in Sutherland, Kinross, Bute, and Peebles. Marriages as performed by clergy of other denominations bulk most largely in Aberdeen, with 8·48 per cent. of all, Forfar with 8·56 per cent., Nairn with 8·77 per cent., Lanark with 9·99 per per cent., and Caithness with 11·31 per cent.; least so in Haddington with 1·93 per cent., Kincardine with 0·99 per cent., and Kirkcudbright with 0·90 per cent.; there being none in Kinross or Peebles. Irregular marriages are in greatest proportion in Forfar 3·28 per cent., Aberdeen 3·59 per cent., Lanark 8·95 per cent., and Edinburgh 11·61 per cent.; least so in Ross and Cromarty and in Wigtown each 0·57 per cent., Berwick 0·56 per cent., and Kincardine 0·50 per cent., there being none in thirteen counties.

In the lower portion of Table X*a*. similar information may be obtained as to the Principal Towns in Scotland, thus it is there seen that in Leith, Perth, and Kilmarnock over 50·00 per cent. of the marriage ceremonies were solemnised by clergymen of the Established Church; the lower rates falling in Govan and Partick, 32·08 per cent.; Paisley, 31·50 per cent.;

of other denominations than the foregoing occur mostly in Aberdeen, 10·26 per cent.; Glasgow, 10·69 per cent.; Govan and Partick, 10·81 per cent.; and Dundee, 11·26 per cent.: being lowest in Edinburgh, 4·80 per cent.; and Leith, 3·90 per cent. Irregular marriages show their highest rate in Glasgow, 12·41 per cent., and in Edinburgh, 16·02 per cent.; their lowest in Leith, 1·62 per cent., and Paisley, 0·65 per cent.

In Table XIII. there is given a series of ages at which all those who entered into the state of matrimony during the year did so, with the exception of three of each sex, who omitted to give this information. Of the total celebrations 2,009, or 6·1 per cent. of the husbands, and 6,019, or 18·2 of the wives, were under 21 years of age on the occasion. Five of the brides were between 15 and 16 years of age at marriage, and seventy-eight between 16 and 17 years, while two of the bridegrooms were between 16 and 17 and twenty-six between 17 and 18 years of age. Twenty-two of

Table XIV. shows the proportion of the men and women at different ages who contracted marriage in Scotland and in each of the five groups of districts during 1899. Thus in Scotland 2·50 in every hundred marriages among males occurred between the age of 15 and 20 years, 10·43 being the corresponding ratio among the females; these proportions are exceeded in the case of both sexes in the Principal Town Districts, and as to the females alone in the Large Town and Small Town Districts. Between 20-25 years, 34·53 per cent. of the marriages among the males, and 44·84 per cent. among the females occurred throughout Scotland, ratios exceeded by both sexes in the Large and Small Town Districts. Between 25-30 years, 33·86 per cent. of the men and 26·19 per cent. of the women married, exceeded in the case of both sexes in the Mainland Rural Districts, by that of the males alone in the Small Town Districts, and by that of the females in the Insular Rural Districts. Between 30-35 years, 14·24 per cent. of the males married, and 9·69 per cent. of the females, exceeded by both sexes in the Principal Town Districts and both Rural. Between 35-40 years, 6·83 per cent. of the males and 4·65 per cent. of the females married, ratios exceeded as to both sexes in the two Rural Districts. Between 40-50 years, 5·34 per cent. of the men and 3·35 per cent. of the women married, proportions exceeded as to both sexes in the Principal Town and Insular Rural Districts. At 50 years and over, 2·69 in every 100 marriages among the males occurred in Scotland, 0·84 being the corresponding proportion among the females.

During the year 29,198 bachelors married spinsters, 863 bachelors espoused widows, 2097 widowers united with spinsters, and 814 widowers with widows; or 88·54 per cent. of the marriages were between bachelors and spinsters, 2·62 per cent. between bachelors and widows, 6·36 per cent. between widowers and spinsters, and 2·47 per cent. between widowers and widows.

Table XVIII. shows the proportion of men and of women married during the year who signed their names to the register of the same, or who, not presumably able to write, simply appended their *mark* in lieu thereof, and which may be taken as an indication as to how far at least primary education stands in Scotland. During the year 98·09 per cent. of the husbands and 97·17 per cent. of the wives signed their names, leaving 1·91 per cent. of the former and 2·83 per cent. of the latter as unable to do so. When compared with the like proportions ten years ago great improvement is seen to have occurred, for in 1889 there signed 95·70 per cent. of the husbands and 92·62 per cent. of the wives, while 4·30 per cent. of the former and 7·38 per cent. of the latter made use of *mark*. The above proportions vary considerably in the different districts; in the Principal Town Districts 1·89 per cent. of the men and 3·28 per cent. of the women did not sign their names; in the Large Town Districts 2·24 per cent. and 2·29 per cent. respectively did likewise; in the Small Town Districts the ratios are 2·11 per cent. and 2·22 per cent.; in the Mainland-Rural Districts 0·39 per cent. and 1·25 per cent.; and in the Insular-Rural Districts they are 7·07 per cent. and 16·08 per cent.

In eleven counties a larger proportion of the husbands appended their *mark* than is the case for all Scotland, and in six counties the wives did the same, in most cases the failing occurring in the same county with both sexes, these latter being Caithness, Sutherland, Ross and Cromarty, Inverness, Argyll, and Lanark, the males failing over and above in Nairn, Dumbarton, Linlithgow, Peebles, and Wigtown. In Orkney and Kinross all of

Digitized by Google

both sexes signed, all the males in Kincardine, Clackmannan, and Selkirk, and all the females in Bute, Berwick, and Peebles doing likewise.

At the foot of the Table similar information is given for Edinburgh and Glasgow. In the former city 99·31 per cent. of the men married during the year wrote their names, 98·98 per cent. of the women doing the same, leaving 0·69 per cent. of the former and 1·02 per cent. of the latter who made use of their *mark;* in Glasgow the corresponding ratios are 97·28 per cent. of the husbands and 95·17 per cent. of the wives writing, leaving 2·72 per cent. and 4·83 per cent. respectively apparently unable to do so.

15·02 per cent. of the marriages throughout Scotland were registered during June, 13·34 per cent. during December, 12·81 per cent. during July, 12·27 per cent. during January, 7·42 per cent. during April, 6·63 per cent. during October, 6·47 per cent. during November, 6·33 per cent. during September, 6·25 per cent. during August, 4·97 per cent. during February, 4·77 per cent. during March, and 3·72 per cent. during May.

The marriage rate per ten thousand of the estimated population in the undernoted European States during 1899 is as follow:—62 in Sweden, 71 in Norway, 74 in the Netherlands and in Italy, 76 in France, 78 in Switzerland, 82 in Austria and in Belgium, 85 in the German Empire and in Prussia, and 89 in Hungary.

DEATHS.

79,593 deaths were registered as occurring in Scotland during 1899, which gives a mortality rate of 181 in every ten thousand of the population as estimated, or one death in every 55 of the inhabitants. 33,903 of those are males and 39,690 females. The mortality rate among the males alone for the present year is 187, and among the females 176 per ten thousand of the sexes respectively. The mean death-rate for the last ten years is 186 per ten thousand of the population.

Tables XIX. and XX. give the number of deaths for each sex, and the corresponding mortality rates in each of the five primary Registration Districts. From the former Table, the number of deaths altogether registered in the Principal Town Districts is 35,870, the rate being 199 in every ten thousand of the inhabitants of the same; the male deaths number 18,130, and the female 17,740; in the Large Town Districts the total deaths are 10,746, equal to 189 in each ten thousand of the inhabitants; the male deaths are 5,508, and the female 5,238; in the Small Town Districts the total is 15,762, the equivalent rate being 170 per ten thousand of the population; the male deaths are 7,697, the female 8,065; in the Mainland Rural Districts the deaths are 15,313, the rate 159 per ten thousand of the population; the males 7,701, the females, 7,612; and in the Insular-Rural Districts the deaths amounted to 1,902, giving a rate of 157 in each ten thousand of the population of the same—the males 867, the females 1035. The total Urban and Rural rates being compared, show the rate per ten thousand in the former to be 189, while in the latter it is 159. The death-rate in the case of both sexes is, in the Principal Town Districts and Large Town Districts higher than the same for Scotland, and in the Insular-Rural Districts the female mortality rate is higher than that for the males.

Tables XXI. and XXII. afford similar information as to the Principal Towns in Scotland. Glasgow shows a total of 15,827 registered deaths during 1899, being at the rate of 21·3 per thousand of its population as

Digitized by Google

estimated; in Edinburgh the deaths number 5,858, giving a rate of 19·2 per thousand; Dundee indicates a total of 3,190, with a mortality rate of 19·9 per thousand; Aberdeen shows a total of 2,719 deaths, the rate corresponding being 18·4 per thousand; in Govan and Partick 2,040 deaths are registered, at the rate of 16·4 per thousand; in Leith they total to 1,411, or 18·6 per thousand; in Paisley they are 1,509, or 19·6 per thousand; in Greenock they are 1,321, with a rate of 19·6 per thousand; in Coatbridge they are 761 and 21·3 respectively; in Perth they are 595 and 18·4; and in Kilmarnock the deaths registered are 639, giving a mortality rate of 19·3 per thousand of the population.

Tables XXIII. and XXIV. are prepared to show the number of deaths at a series of ages, and the percentage of the same to the numbers presumably alive at the like ages in Scotland, and in each of its five primary Registration Districts. Thus, of children under one year of age, 15·937 per cent. of the males and 13·178 per cent. of the females died throughout Scotland

TABLE XIX.—Deaths of Males and Females in Scotland, and its Five Groups of Districts, during each of the Years 1855–1899.

during the year, rates exceeded in the case of both sexes in the Principal and Large Town Districts. In the other districts the rates are under those for Scotland, being lowest in the Insular Rural Districts, with a male mortality rate of 8·736 per cent., and a female of 5·303 per cent. In each district the male rate at this early age is higher than the female.

Under two years of age, the death-rate in Scotland in the case of the males is 5·101 per cent., and of the females, 5·008 per cent.; ratios exceeded in the case of both sexes in the Principal Town Districts, and of the females in the Large Town Districts. The lowest rates fall in the Insular Rural Districts, 1·727 per cent. and 1·943 per cent. respectively. The female rate is higher than that of the male in the Large Town Districts and Insular Rural Districts.

Under three years of age the death-rate among males in Scotland is 1·819 per cent., and among females 1·970 per cent., proportions exceeded

and that as to both sexes in the Principal Town Districts, and as to males in the Large Town Districts. The lowest rate occurs in the Insular Rural Districts, 0·640; and in Scotland, in the Principal and Small Town Districts, and in both Rural the female rate is above that of the male.

Under four years of age the male death-rate for the country is 1·077 per cent. and the female, 1·126 per cent., exceeded in the case of both in the Principal and Large Town Districts. In each case, except in the Mainland Rural Districts, the female rate is higher than the male.

Under five years of age the rate for the respective sexes in Scotland is 0·750 per cent. and 0·727 per cent., exceeded in the case of both in the Principal Town Districts, of the males alone in the Large Town Districts, and of the females in the Small Town Districts. In the Principal and Small Town Districts, the female rate is higher than the male.

At all ages under five years the male mortality rate is 5·121 per cent. and the female 4·533 per cent. of all presumably alive at that age in Scotland. Between 5-10 years the rates are 0·411 per cent. and 0·434 per cent. for the respective sexes; and during the next five year period, 10-15 years, the death rate is at its minimum, that for the males in Scotland being 0·270 per cent. and for the females 0·310 per cent. These rates are somewhat exceeded as to both sexes in the Principal Town Districts, in the case of

the males in the Large Town Districts, and of the females in the Small Town and Insular-Rural Districts, and in all cases except the Principal Town Districts the female rate is higher than the male. Between 15-20 years the death rate for Scotland rises in the case of the males to 0·427 per cent., and of the females to 0·467 per cent., exceeded as to the former sex in the Principal Town Districts and Mainland-Rural Districts, and as to the latter in the Large Town and Small Town Districts, and in Scotland, in the Large Town, Small Town, and Insular-Rural Districts the female rate is higher than the male. Between 20-30 years the male rate for the whole country is 0·739 per cent., and the female 0·660 per cent., ratios exceeded in the case of both sexes in the Large Town Districts, of the males in the Principal Town and Insular-Rural Districts, and of the females in the Mainland-Rural Districts. At ages over 30 the mortality rate rises steadily, and generally more markedly so in the Urban than in the Rural Districts, and as a rule that among the males is higher than is the case with the opposite sex. The male death-rate at all ages for Scotland is 187 per ten thousand of the same sex, the female is 176. In the Principal Town Districts, the male rate is 210 per ten thousand, the female, 189; in the Large Town Districts they are 194 and 178 respectively; in the Small Town Districts they are 170 and 169; in the Mainland-Rural Districts they are 162 and 156; and in the Insular-Rural Districts the male mortality rate is 151 per ten thousand of population as estimated, the female, 163 in like proportion.

Table XXVI. gives the number of deaths at the same stated ages in each of the Principal Towns in Scotland, and Table XXVII. the proportions of the same to those presumably alive at like ages. Thus, at ages under one year, the greatest mortality occurs in Dundee, where, in every hundred infants alive at that age, 19·46 died; followed by Leith with 17·73, Edinburgh with 17·65, Glasgow with 17·29, Aberdeen with 17·13, Coatbridge with 16·04, Greenock with 15·91, Kilmarnock with 15·72, Govan and Partick

with 15·65, Paisley with 14·55, and Perth with 13·73. During the second year of life, the heaviest mortality occurred in Coatbridge, where 9·14 in every hundred at this age died, followed by Greenock with 8·00, Glasgow with 7·95, Govan and Partick with 7·07, Leith with 6·68, Dundee with 6·29, Edinburgh with 5·87, Kilmarnock with 5·76, Paisley with 5·64, Aberdeen with 5·61, and Perth with 3·82. At all ages under five years, the highest death-rate per hundred falls in Glasgow of 6·58, followed by Coatbridge

noted European States during the year is as follows:—270 in Hungary 254 in Austria, 221 in Italy, 215 in the German Empire, 211 in France 188 in Belgium, 176 in Sweden and in Switzerland, 175 in Denmark, 171 in the Netherlands, 168 in Norway.

CAUSES OF DEATH.

Of the 79,593 deaths registered in Scotland during the year, 684 were specified in such a manner or so ill-defined as to be of no use for statistical purposes.

The death-rate for Scotland, the sexes combined, is, for the year now being considered, 1813 in every hundred thousand of the inhabitants as estimated, the male rate being 1873 and the female 1757.

The deaths registered from Zymotic diseases in all Scotland during 1899 are in all 10,736, being in the proportion of 247 in every hundred thousand of the population, and constituting 13·61 per cent. of the total mortality. The incidence of those diseases is most marked in the Principal and Large Town Districts, least so in the Mainland-Rural Districts. (Tables XXVIII. and XXIX.)

Table XXXII. shows the number and proportion of deaths at five periods of life from the chief Zymotics and from ordinary causes. Thus, of the whole 10,736 such deaths, 6805 occurred during the first five years of life, 590 between the ages of 5-10 years, 188 between 10-15 years, 1906 between 15-60 years, and 1247 at greater ages: the corresponding proportions of those being 63·4 per cent. during the early period, 5·5 per cent. during the next quinquennial period, 1·8 per cent. between 10-15 years, 17·7 per cent. between 15-60 years, and 11·6 per cent. at ages over 60 years, so that of the whole 70·7 per cent. occurred during the first 15 years of life. Table XXXIII. shows that of the total deaths at ages up to 15 years 25·18 per cent. are due to Zymotics, 6·37 being the percentage at ages above 15 years.

Small-pox caused but a single death in Scotland during 1899. To Measles 1599 deaths are ascribed, 1481 or 92·6 per cent. occurring during the first five years of life, 77 or 4·8 per cent. between 5-10 years, and 41 or 2·6 per cent. at a greater age. Scarlet Fever is the cause of 831 deaths, of which 534 or 64·3 per cent. happened under the age of five years, 175 or 21·1 per cent. during the following quinquennium, 48 or 5·8 per cent. between 10-15 years, 73 or 8·7 per cent. between 15-60 years, and 1 death was registered at an age above 60 years. Hooping-Cough accounts for 1894 exits during the year, 1832 or 96·7 per cent. of them during the first five years of life, and 58 or 3·1 per cent. during the next age period. From Influenza there were 1454 deaths, 137 or 9·4 per cent. during the early age, 32 or 2·2 per cent. between 5-15 years, 524 or 36·1 per cent. between 15-60 years, and 761 or 52·3 per cent. at ages over 60 years. To Diphtheria 697 deaths are allocated, 519 or 74·5 per cent. between 0-5 years, 135 or 19·4 per cent. between 5-10 years, 19 or 2·7 per cent. between 10-15 years, 23 or 3·3 per cent. between 15-60 years, and one at a greater age. Fevers caused 851 deaths, 40 or 4·7 per cent. at the early age, 70 or 8·2 per cent. between 5-10 years, 74 or 8·7 per cent. between 10-15 years, 637 or 74·9 per cent. between 15-60 years, and 30 or 3·5 per cent. at a greater age. Of those, Typhus caused 29 deaths, 26 of them at ages between 15-60 years; Enteric or Typhoid caused 803 deaths, 33 or 4·1 per cent. during the first five years of life, 67 or 8·3 per cent. between 5-10 years, 71 or 8·8 per cent.

Digitized by Google

between 10-15 years, 606 or 75·5 per cent. between 15-60 years, and 26 or 3·3 per cent. at a greater age. Cerebro-Spinal Fever is the cause of 4 deaths, and Simple or Ill-defined of 15. Diarrhœa and Dysentery caused 2474 deaths, 1896 or 76·6 per cent. between 0-5 years, 32 or 1·3 per cent. between 5-10 years, 6 or 0·2 per cent. between 10-15 years, 188 or 7·6 per cent. between 15-60 years, and 352 or 14·3 per cent. at ages over 60. Syphilis caused 202 deaths, 167 or 82·7 per cent. during the first term of life. Erysipelas caused 174 deaths, 51 or 29·4 per cent. during 0-5 years, 7 or 4·0 per cent. between 5-15 years, 58 or 33·3 per cent. between 15-60 years, as also the same at a greater age. Puerperal Fever caused 214 deaths, all naturally between the age of 15-60 years. Among other diseases Croup caused 159 deaths, 139 or 87·4 per cent. between birth and the fifth year, 19 or 12·0 per cent. during the following quinquennial period, a single death being registered from it between 15-60 years.

Out of every hundred thousand of the population of Scotland 247 are estimated to have succumbed to diseases of a Zymotic character, and equal to 13·61 per cent. of the total specified mortality. In the Principal Town Districts 293 per hundred thousand of the estimated population of the same died from Zymotics, equivalent to 14·73 per cent. of the total deaths in those districts; in the Large Town Districts the rates are 258 to population and 13·92 per cent. of all the deaths; in the Small Town Districts they are 233 and 13·72 per cent. respectively; in the Mainland-Rural Districts 171 and 10·74 per cent.; and in the Insular-Rural Districts they are 195 per hundred thousand of population and 12·43 per cent. of the total mortality.

Table XXX. gives the proportion of deaths from various diseases to the population in each of the Principal Towns in Scotland, and Table XXXI. the proportion of deaths from the same diseases to the total deaths in each. Thus in Glasgow Zymotics are the cause of 317 deaths in every hundred thousand of the estimated population, and equal to 14·88 per cent. of the total specified deaths in the same. Diarrhœa and Dysentery account for 77 of the former, Measles for 75, Hooping Cough for 44, Scarlet Fever for 27, Fevers for 25 (24 of those being Enteric), Influenza for 22, and Diphtheria for 15.

In Edinburgh 258 deaths per hundred thousand of its inhabitants occurred from Zymotics, equal to 13·47 per cent. of all deaths. Hooping Cough is the cause for 66 of the former, Diarrhœal Affections for 60, Influenza for 34, Measles for 27, Scarlet Fever and Fevers each for 17 (14 of the latter are Enteric and 2 Typhus), and Diphtheria for 16.

In Dundee the proportion is 258 to population, being 12·93 per cent. of all the specified deaths. Diarrhœa and Dysentery is accountable for 97 of the former, Hooping Cough for 51, Measles for 29, Diphtheria for 23, Fevers for 16 (3 Typhus, 13 Enteric or Typhoid), and Scarlet Fever and Influenza each for 9.

In Aberdeen the proportion of Zymotic deaths to population as above is 292, or 15·89 per cent. of all the deaths. Measles accounts for 91 of this proportion, Diarrhœa and Dysentery for 51, Hooping Cough for 34, Influenza for 33, Diphtheria for 21, Fevers for 16 (15 being Enteric), and Scarlet Fever for 12.

In Govan and Partick 218 in every hundred thousand of the inhabitants succumbed to Zymotics, or 13·30 per cent. of the total deaths were of this nature. 69 of the former ratios are due to Measles, 60 to Diarrhœal Affections, 28 to Hooping Cough, 22 to Influenza, 11 to Diphtheria, 6 to Fevers (all Enteric), and 5 to Scarlet Fever.

Digitized by Google

In Leith the proportion is 296 to population as before, or 15·91 per cent. of all deaths. Of the former 132 is due to Hooping Cough, 66 to Diarrhœa

thousand of population, or 16·91 per cent. of all deaths. 129 of this is due to Diarrhœa and Dysentery, 115 to Measles, 30 to Scarlet Fever, 18 to Diphtheria, 13 to Fevers (all Enteric), and 7 each to Influenza and Hooping Cough.

In Coatbridge the rate to population from Zymotics is 401, equal to 18·78 per cent of the total deaths. Of the former 127 is due to Hooping Cough, 88 to Measles, 62 to Diarrhœal Affections, 31 to Diphtheria, 28 to Fevers (all Enteric or Typhoid), and 17 to Scarlet Fever and to Influenza.

In Perth 255 persons per hundred thousand died from Zymotics, or 13·87 per cent. of all deaths were of this nature. 68 of this is due to Diarrhœa and Dysentery, 53 to Hooping Cough, 34 to Scarlet Fever, 25 to Measles, 22 to Influenza, 19 to Diphtheria, and 16 to Fevers (all Enteric).

In Kilmarnock the mortality-rate from Zymotics is 372 to the population, and equal to 19·24 per cent. of all deaths in the town. Diarrhœal Affections account for 64 of this, Influenza and Fevers each for 58 (all the latter Enteric), Scarlet Fever for 55, Hooping Cough for 46, Measles for 30, and Diphtheria for 24.

A single death from Small-pox is registered in Scotland during the year, and that was in Glasgow, in the person of an engineer, *æt.* 39 years, during the month of June.

Measles caused 1599 deaths in Scotland during 1899, being at the rate of 37 in every hundred thousand of the population, and forming 2·03 per cent. of the total specified deaths; of those 839 were males and 760 females. The Principal Town Districts suffered most, as here 59 deaths in every hundred thousand of the population were so caused. The Mainland-Rural Districts show the lowest proportion—16.

Scarlet Fever is the ascribed cause of 831 deaths, affording a mortality-rate of 19 per hundred thousand of population, or 1·05 per cent. of all deaths—males 381, females 450. The Principal and Large Town Districts show the heaviest mortality from this, viz., 21 in the former and 26 in the latter, the rate in the Insular-Rural Districts being but 5 in like proportion.

From Influenza 1454 deaths are registered, being at the rate of 33 in every hundred thousand of population, and forming 1·84 per cent. of all specified deaths; males 625, females 829. The two Rural Districts evidently suffered in proportion most severely, the rate in the Mainland-

Rural being 44, and in the Insular-Rural Districts 117 per hundred thousand of their respective populations.

Hooping Cough caused 1894 deaths, giving a mortality-rate of 44 per hundred thousand, and equal to 2·40 per cent. of all the deaths—males 847, females 1047. The highest rates occur in the three Urban Districts, being 51 in the Principal Town Districts, 50 in the Large Town Districts, and 48 in the Small Town Districts.

From Diptheria 697 deaths are returned, equal to 16 deaths per hundred thousand of the inhabitants, and 0·88 per cent. of all deaths—males 349, females 348. The Large Town Districts indicate the heaviest death-rate from Diptheria 21, the lowest 4, occurring in the Insular-Rural Districts.

Continued Fevers caused 851 deaths, a mortality-rate of 20 in every hundred thousand of population, and equal to 1·08 per cent. of all deaths—males 490, females 361. The rate for fevers is somewhat higher in each of the three Urban Districts than for Scotland, the rate in the Mainland-Rural Districts being 14, and in the Insular-Rural Districts 12. Typhus Fever caused 29 deaths throughout Scotland; Enteric or Typhoid caused 803 (males 468, females 335), together giving a rate of 18 per hundred thousand of population. Cerebro-Spinal Fever caused 4 deaths, Simple or Ill-defined 15. Table XXXVII. shows that 134 of the Typhoid deaths were registered in the Rural Districts, forming 91·78 per cent. of the total fever mortality in the same, while 669 of them occurred in the Urban Districts, equal to 94·89 per cent. of the fever mortality therein. Typhus caused 21 deaths in the Urban Districts, and 8 in the Rural.

Diarrhœa and Dysentery caused 2474 deaths throughout Scotland, giving a mortality-rate of 57 per hundred thousand of population, and equal to 3·14 per cent. of all deaths—males 1238, females 1236. Much the highest mortality from these occurred in the Principal and Large Town Districts;

74 and 67 respectively, the lowest rate, 13 per hundred thousand of the inhabitants falling to the Insular-Rural Districts.

To Cancer 3572 deaths are ascribed, being at the rate of 82 per hundred thousand of population (the male rate is 67, the female 97), and together equal to 4·53 per cent. of the total deaths—males 1405, females 2167. The highest rate occurs in the Mainland-Rural Districts 91, in the Principal Town Districts it is 86, in the Large Town Districts it is 72, in the Small Town Districts it is 74, and in the Insular-Rural Districts it is 70. From Tables XXX. and XXXI., which refer to the Principal Towns, it is seen the highest mortality-rate from Cancer falls in Dundee, 116 per hundred thousand of its inhabitants, followed by Edinburgh with 107 in like ratio, Aberdeen with 96, Glasgow with 83, Perth with 81, Leith with 79, Coatbridge with 68, Kilmarnock with 61, Paisley with 57, Greenock with 52, and Govan and Partick with 50.

Diseases of a Tubercular nature caused 10,497 deaths, equal to 241 in every hundred thousand of population, and forming 13·30 per cent. of the total specified deaths—males 5354, females 5143. The rates in the Principal and Large Town Districts are over that for Scotland, being 275 in the former, and 259 in the latter; in the Small Town Districts the rate is 219, in the Mainland-Rural Districts 194, and in the Insular-Rural Districts 192 to population as above. The percentage-rate to the total deaths is 13·81 in the Principal Town Districts, 13·97 in the Large Town Districts, 12·89 in the Small Town Districts, 12·18 in the Mainland-Rural Districts, and 12·21 in the Insular-Rural Districts. Phthisis claims by far the largest number of such deaths, 7275 in all, males 3679, females 3596, together equal to 167 per hundred thousand of the inhabitants, and forming 9·22 per cent. of the total mortality in Scotland. The death-rate from Consumption in each of the five primary Registration Districts is 187 to the population as before in the Principal Town Districts, 178 in the Large Town Districts, 151 in the Small Town Districts, 140 in the Mainland-Rural Districts, and 149 in the Insular-Rural Districts. Of the males who succumbed to this disease, 7·7 per cent. were under 15 years of age, 69·3 per cent. between 15-45 years of age, and 23·0 per cent. at greater ages, the ratios at the corresponding ages among the females are 11·6 per cent. 72·4 per cent., and 16·0 per cent. In the Principal Towns, Phthisis took toll from every hundred thousand of the inhabitants as follows:—198 in Glasgow, 191 in Edinburgh, 199 in Dundee, 167 in Aberdeen, 136 in Govan and Partick, 202 in Leith, 175 in Paisley, 172 in Greenock, 155 in Coatbridge, 199 in Perth, and 207 in Kilmarnock. Tabes Mesenterica caused 1010 deaths in Scotland, males 517, females 493; Tubercular Meningitis caused 1300 deaths, males 672, females 628; and Scrofula 912, males 486, females 426.

Diseases of the Brain and Nervous System account for 9266 exits, equivalent to 213 per hundred thousand of population, and forming 11·74 per cent. of all deaths—males 4552, females 4714. The mortality-rate to the population from such diseases is in the Principal and Large Town Districts higher than that for Scotland, being 225 in both, in the Small Town Districts it is 203, in the Mainland-Rural Districts it is 199, and in the Insular-Rural Districts it is 164. Among the Principal Towns the highest rate is in Paisley 272, followed by Greenock with one of 265, Coatbridge with one of 251, Kilmarnock with one of 241, Perth with one of 237, Dundee with one of 230, Glasgow with one of 224, Aberdeen with one of 216, Edinburgh with one of 215, and Govan and Partick and Leith each with one of 204. Of the more important Nervous diseases Apoplexy caused 3533 deaths—males 1521, females 2012; Paralysis 1557—males

764, females 793; Epilepsy 238—males 121, females 117; and Convulsions 1120—males 649, females 471.

per cent. of all deaths—males 3515, females 3890. The highest rate occurs in the Mainland-Rural Districts—183 to population as above—and lowest in the Insular-Rural Districts, where it is 135; in the Principal Town Districts it is 164, in the Large Town Districts 165, and in the Small Town Districts 177. As to the Principal Towns the highest rate falls in Edinburgh—195 per hundred thousand of its inhabitants—followed by Dundee with one of 190, Greenock 172, Perth 165, Paisley 163, Aberdeen 160, Glasgow and Kilmarnock each 158, Coatbridge 155, Leith 132, and Govan and Partick 104.

Diseases of the Respiratory Organs caused 13,562 deaths, equal to 312 in each hundred thousand of population, and 17·19 per cent. of all deaths—males 7244, females 6318. The rates in the Principal and Large Town

Districts are above that for Scotland, being in the former 385 and in the latter 314 to their respective populations, in the Small Town Districts it is 264, in the Mainland-Rural Districts 219, and in the Insular-Rural Districts 210. Among the Principal Towns Glasgow stands first with a mortality-rate to its population as before of 459, followed by Greenock with one of 392, Paisley 379, Dundee 372, Coatbridge 370, Govan and Partick 346, Leith 338, Aberdeen 307, Edinburgh 303, Kilmarnock 296, and Perth 283. Throughout Scotland Bronchitis caused 6140 deaths—males 2972, females 3168; Pneumonia caused 5712 deaths—males 3351, females 2361; and Croup caused 159 deaths—males 82, females 77.

To Diseases of the Digestive System 6158 deaths are registered, being 141 in every hundred thousand of population, and forming 7·80 per cent. of all deaths—males 3073, females 3085. The rate for Scotland is exceeded in each of the Urban Districts, that in the Principal Town Districts being 152, in the Large Town Districts 147, and in the Small Town Districts 145; in the Mainland-Rural Districts it is 122, and in the Insular-Rural Districts 83. Among the Principal Towns the highest rate occurs in Coatbridge —186 to population—followed by Kilmarnock with 183, Govan and Partick 164, Dundee with 161, Glasgow with 158, Leith with 153, Aberdeen with 146, Edinburgh with 143, Paisley with 138, and Greenock and Perth each with 109. To Enteritis 2179 deaths are registered in Scotland—males 1143, females 1036; to Peritonitis 715—males 342, females 373; to Hernia 144—males 61, females 83. Liver diseases caused 798 deaths—males 394, females 404. Ileus and Stricture of the Intestine and Intussusception together caused 412 deaths—males 205, females 207.

To Diseases of the Urinary Organs 2091 deaths are ascribed, being in the ratio of 48 in every hundred thousand of the inhabitants, and forming

2·65 per cent. of all deaths—males 1263, females 828. Acute Nephritis caused 391 deaths, Bright's Disease 1022, Calculus 26, Other Diseases of the Bladder and Prostate 393, and 259 are caused by various other pathological conditions of the same system not included in the above.

Diseases of the Organs of Reproduction or Generation caused 545 deaths, or 13 in every hundred thousand of population, and equal to 0·69 per cent. of all deaths—males 8, females 537. To Ovarian disease 67 deaths are ascribed, and to Uterine affections 104. Diseases incidental to Parturition, not including Puerperal Fever, to which latter 214 deaths are due, cause 341—together a total of 555.

From diseases of the Organs of Locomotion—bones and joints—there are 318 deaths registered, equal to 7 in every hundred thousand of population—males 177, females 141; and to diseases of the Skin 141 deaths are ascribed, in the persons of 64 males and 77 females.

Developmental diseases, not including Old Age, are accountable for 2673 deaths—males 1480, females 1193. Of those, Premature Birth is the ascribed cause for 2154, Atelectasis for 146, Cyanosis, Spina Bifida, and other congenital defects for 373.

To Old Age the death of 4337 persons are registered, a mortality-rate of 100 per hundred thousand of population, and 5·50 per cent. of all deaths—males 1616, females 2721. At ages between 95–100 years 43 men and 111 women died, while one of the former sex and eleven of the latter are reported as being 100 or over at death. The man who died *aet.* 100 was a pauper, formerly a pedlar. Four of the women were 100 years of age at death, in the persons of a pauper, and the widows of a crofter, a fisherman,

and a farmer respectively. Six of them were *aet.* 101 years, all widows, and one *aet.* 102, was a pauper, and formerly a domestic servant.

From Violence there are 3204 deaths, a rate of 74 per hundred thousand of population (male rate 109, female rate 40), forming 4·06 per cent. of all deaths—males 2304, females 900. Those due to Violence other than Accident are 256—males 182, females 74—and of those 11 are Homicidal and 245 Suicidal—the male suicides being 177 and the female 68. Accident or Negligence is the cause of 2948 deaths—males 2122, females

Digitized by Google

are fatal in 42 cases—all males. Accidental Drowning caused the death of 465 males and 82 females, and by Suicidal Drowning 36 males and 21 females ended their lives. From Burns and Scalds 235 deaths occurred—152 males, and 183 females. By Suffocation 375 deaths are accounted for—males 195, females 180—and of those 212 occurred in bed—104 males, and 108 females. Seventy-one males and 52 females were accidentally poisoned, and 8 males and 13 females ended their own lives by taking poison.

The poisons by which death was accidentally caused are—Opium, in some form, 19 males and 14 females; Chlorodyne, 1 female; Chloroform, 6 males and 7 females; Chloral Hydrate, 2 males; "An Anæsthetic," 1 male; Strychnia, 1 female; Aconite, 1 male and 3 females; Hemlock, 1 male; Oxalic Acid, 1 male and 1 female; Salts of Sorrel, 1 female; Cyanide of Potassium, 1 male; Alcohol, 7 males and 1 female; Lead, 4 males and 1 female; Carbonic Oxide, 9 males and 4 females; Ammonia, 2 males and 1 female; Phosphorus, 3 females; Arsenic, 2 males; Hydrochloric Acid, 2 males; Sulphuric Acid, 2 males; a "Corrosive Poison," 1 female; a "Caustic Alkali," 1 female; Carbolic Acid, 2 males and 6 females; a Ptomaine, 3 males and 3 females; Blood-poisoning from a sting, 1 female; Shell-fish, 1 male; "a Disinfectant," 1 female; "Irritant Poison," 2 males; others not indicated, 3 males and 1 female.

The poisons by which Suicide was effected are—Opium, 2 males and 7 females; Hydrocyanic Acid, 1 male; Strychnia, 1 female; Carbolic Acid, 4 males and 2 females; Oxalic Acid, 1 male and 1 female; Salts of Sorrel, 1 female; "a Liniment," 1 female.

Table XXXIX*a.* shows the methods by which Suicide was accomplished in Scotland and in its groups of Districts, its Counties, and Principal Towns. Thus, of 245 suicides 7 males effected their purpose on railways; 20 males shot themselves; 44 males and 8 females so cut or stabbed themselves that they died; 3 males and 6 females precipitated themselves from a height; 36 males and 21 females drowned themselves; 58 males and 19 females hung themselves; 8 males and 13 females had recourse to poison; and 1 male and 1 female took their own lives in a manner not particularly stated. In the different Districts the suicides are as follows:—In the Principal Town Districts 68 males and 30 females ended their own lives; in the Large Town Districts 22 males and 6 females did the same; in the Small Town Districts the numbers are, males 39 and females 14; in the Mainland-Rural Districts the males numbered 43 and the females 18; and in the Insular-Rural Districts 5 males so died, no females committing suicide in the same.

WEATHER AND ITS INFLUENCE ON THE MORTALITY.

The following remarks on the weather of the year are the Notes made by Dr. Buchan, under the direction of the Council of the Scottish Meteorological Society, which appear in the Registrar-General's Quarterly Reports:—

The weather of *January* was characterised by an unusually low barometric pressure, accompanied with an unusually large monthly range; a mean temperature half a degree under the average, with a mean daily range considerably above it; a high mean humidity; a large mean rainfall, having been only five times exceeded since 1856, and falling on three days more than the average; and winds, as regards direction, nearly the average, blowing with a less force than has been recorded since 1881.

Digitized by Google

The mean barometric pressure was 29·675 inches, or 0·105 inch less than the average. This diminution of pressure was greater in the south than in the north, but the same, latitude for latitude, in both the east and west. The results of this distribution of the pressure were a reduction or the usual gradient from south to north and a less wind force than usual, and a direction nearly normal.

The mean temperature was 36°·6, or 0°·5 under the average, the days being the average, but the nights a degree below it. Thus the greater cold was wholly caused by the greater cold of the nights. In the south, generally, temperature was above the average, the greatest excess, about a degree, being in the south-west from Islay to Wigtownshire; whereas to the north of the Forth and Clyde, temperature was under the average, the lowest temperatures, nearly two degrees under the average, being from the Pentland Firth to Strathtay. The coldest weather was from the 12th to the 18th and from the 23rd to the 27th. The absolutely highest temperature was 55°·0 on the 4th at Airds; and the lowest 7°·0 on the 5th at Aberlour.

The mean rainfall was 5·02 inches, or 29 per cent. above the average. The amounts were very irregularly distributed over the country, being above the average in Shetland, Orkney, and over the east side of Scotland for a great way inland, and, except at one or two isolated stations, everywhere to the south of the Grampians, both east and west. In Caithness and some parts of Aberdeenshire more than double the average fall was recorded. South of the Grampians the excess was nowhere large, exceeding a half more than the average only at a few stations. On the other hand, in the west from Loch Etive to Cape Wrath, the rainfall was less than the average, the deficiency ranging from 10 to 60 per cent.

The weather of *February* was characterised by a mean barometric pressure a little less than the average, with a monthly range greatly in excess of it; a mean temperature about the average, with a mean daily range much larger than usual; a mean humidity a good deal under the average; a mean rainfall rather under the average, falling two days fewer than usual; a wind force much under the average, the direction being two days of S.-E. wind and two days' calms in excess of the average.

The mean barometric pressure was 29·763 inches, or 0·090 inch less than the average. The diminution from the average was considerably greater in the south and west than in the north and east, and hence the greater prevalence of south-east winds, and, as pressure showed reduced gradients as compared with what generally prevails in this month, light winds and calms were more prevalent, the month being singularly free from storms.

The mean temperature was 38°·5, or all but the average. The days were 0°·8 above the average, but the nights 1°·0 under it, thus resulting in a very large mean daily range, with which the reduced humidity was in accordance. The distribution of the temperature was very peculiar. It was less than the average from the head of the Moray Firth through the Caledonian Canal to Fort-William and thence eastwards through inland stations in the counties of Forfar, Perth, and Dumbarton and the south shores of the Firth of Forth. The deficiency nowhere reached a degree, the lowest being 0°·8 at Perth. Everywhere else the temperature was above the average, the greatest excess being nearly a degree and a half in districts surrounding Peterhead, east of Orkney, Monach, Rothesay, Benquhat, and Ladylaw. Temperature was low during the first week, and towards the close of the month night temperatures were very low. The absolutely highest temperature was 59°·6 on the 21st at Fort Augustus, and the lowest 8°·3 on the 5th at Kingussie.

Digitized by Google

The mean rainfall was 2·69 inches, or 12 per cent. less than the average. It was above the average in the counties of Forfar, East Perth, and East Fife, and at isolated situations such as Monach, Airds, Cargen and Wolfelee, but the excess was small, except at Lednathie, where it was 73 per cent., and Airds 44 per cent. In all other parts of Scotland less than the average amounts fell. The greatest deficiencies were 81 per cent. at Glencarron and 69 per cent. at Lairg, but over widespread breadths it was less than a third of the average.

The weather of *March* was characterised by a rather high barometric pressure, with a monthly range a little above it; a mean temperature nearly a degree above the average, and the mean daily range also nearly a degree above it; a mean humidity rather under the average: a mean rainfall considerably above the average, falling on two days more than usual; a wind force slightly under the average, with a greater prevalence of winds from W.S.W., N.W., and N.

The mean barometric pressure was 29·946 inches, or 0·120 inch above the average. The excess was greater in the south and west than in the north and east, resulting in the greater prevalence of dry north-westerly winds.

The mean temperature was 40°·2, or 0°·8 in excess of the average, the days being 1°·3 and the nights 0°·4 above the average, the higher temperature being largely due to the greater warmth of the days. In Shetland, temperature was a degree below the average, and in Orkney about the average; but in all other districts it was above it, the greatest excess, from a degree and a half to two degrees, being in Perthshire and over a considerable breadth to south-westwards as far as Ayr and Kintyre. From the 11th to the 18th temperature was high for the season, rising on the 18th to 68°·0 at Ochtertyre, being absolutely the highest for the month, and during these eight days the mean was 6°·0 above the average of the month. On the other hand, temperature was very low, accompanied with snow and hail during the week ending the 25th, which was 7°·5 under the average in central Scotland. In this week the absolutely lowest, 3°·0, occurred on the 24th at Braemar.

The mean rainfall was 3·54 inches, or 26 per cent. above the average, and it was very irregularly distributed over the country. It was under the average in the neighbourhood of Skye, the north-east of Caithness and Aberdeenshire, on the east coasts from Montrose to the Tweed, and in Ayrshire and Wigtownshire; but in all other districts it exceeded the average. Except in a very few places the departures did not exceed 25 per cent. The largest excesses were 85 per cent. at Stornoway, Cromarty, and Dumfries, and a little over 50 per cent. at Dunrossness, Inverness, Fort-William, Craigrannoch, Airds, Glasgow, and Cargen.

The weather of *April* was characterised by an exceedingly low barometric pressure, with a monthly range a good deal under the average; a mean temperature a degree under the average, with a mean daily range a little under the average; an average mean humidity; a very heavy mean rainfall, falling on 8 days more than the average; being the largest number of rainy days hitherto recorded for April; and 3 days excess of northerly winds.

The mean barometric pressure was 29·735 inches, being 0·158 inch less than the average. This is the lowest mean barometric pressure hitherto recorded for April, except 29·591 inches, which occurred in 1867. The relatively larger diminution of pressure was much greater at eastern than

Digitized by Google

at western stations, resulting in a large excess of northerly winds and a lower temperature than usual for this month.

The mean temperature was 43°·0, or 1°·1 under the average. The deficiency was pretty equably distributed over the country, being only slightly larger at north-eastern than at south-western stations. Temperature was slightly higher during the first and fourth weeks than on the second and third weeks. The absolutely highest temperature was 66°·0 on the 24th at Smeaton, and the lowest 12°·7 on the 22nd at Kingussie.

The mean rainfall was 3·87 inches, or 81 per cent. above the average. This amount has been only exceeded by the rainfall of April 1867, when the mean amount was 4·43 inches. The rainfall was large in all parts of Scotland, falling to the average or below it at no single station. Over large districts considerably more than double the average rainfall was collected. The following are the percentages of excess at a number of places:—215 at Nairn, 195 at Cromarty, 176 at Cawdor, 150 at Monach and Gordon Castle, 160 at Lednathie and Campbeltown, 130 at Dunrobin, Inverness, and Poltalloch. The persistent rainy character of the weather of this month is shown by the circumstance that on each of the 30 days rain is reported from quite a large number of stations somewhere in Scotland, and the singular feature of the rainfall is that though the monthly amount at the stations is great, large single daily falls are conspicuously rare.

The weather of *May* was characterised by a rather high mean barometric pressure, with a monthly range a good deal above the average; an unusually low mean temperature, with an average mean daily range; a mean humidity slightly less than the average; a rainfall considerably above the average, falling on one day more than the average; a very large excess of east-northeasterly winds blowing with the average force of the season.

The mean barometric pressure was 30·020 inches, or 0·087 inch above the average. The excess above the average was considerably greater at western than at eastern stations, and from this geographical distribution of the pressure it followed that winds from E. were 3 days, and winds from N.E. 2 days in excess of the average direction, thus bringing about the very low temperatures which prevailed. The first three weeks of the month rank with the coldest May weather on record.

The mean temperature was 46°·3, or 2°·7 less than the average, the deficiency being very exactly distributed between the days and the nights. It resulted from the prevailing easterly winds that temperature was much lower in eastern than in western districts. As the easterly winds advance over the land, they acquire warmth as they proceed westwards, thus bringing about the remarkable result that while temperature in the east was more than three degrees under the average, in the west it was only half a degree. The absolutely highest temperature was 76°·0 on the 31st at Smeaton, and the lowest 21°·0 on the 27th at Lednathie.

The mean rainfall was 3·29 inches, or 45 per cent. above the average. This is one of the largest rainfalls since that of May 1856. Its distribution over the country was extremely irregular, being less than the average in the north-east of Scotland, north of Donside; and over western districts to the west of a line from Islay, thence passing Inveraray, Kingussie, Fort Augustus, Glencarron, and the Butt of Lewis. The deficiency was comparatively small, scarcely in any case amounting to half the average of the station. Everywhere else in Scotland the rainfall exceeded the average, in many places excessively so. The more prominent heavy monthly falls

Digitized by Google

were above the averages, stated in percentages of excess, 142 at Thurso and Mull of Galloway, 125 at Dundee, St. Abb's, Smeaton, Leith, and Glasgow, and about 100 at Pladda, Haddington, Perth, Arbroath, and Roeberry in Orkney. By far the larger proportion of the rain fell from the 13th to the 20th, and very large daily falls were common on the 15th, 16th, and 17th in the west, from Ardnamurchan northwards; and in other parts of the country very heavy falls occurred on the 18th, 19th, and 20th.

The weather of *June* was characterised by a very heavy mean barometric pressure, with a monthly range somewhat above the average; a very high mean temperature, with an unusually high mean daily range; a low mean humidity; a rather small rainfall, falling on two days fewer than the average; winds nearly the average direction, but blowing with greatly diminished force.

The mean barometric pressure was 30·051 inches, or 0·110 inch above the average; but the excess was distributed over Scotland with singular uniformity, so that the average direction of the wind for the month was maintained. It is noteworthy that no gales are anywhere reported during the month.

The mean temperature was 57°·4, or 2°·6 above the average; but while the nights were only 1°·4 in excess of the average, the days were 3°·7, thus pointing to the clearer skies and strong sunshine which frequently marked the weather of the month. As happens in such anti-cyclonic weather, the excess of temperature was much greater in inland districts than at places on or near the sea coast. Thus generally near the sea, the mean temperature did not exceed the average by more than a degree and a half, whereas in many strictly inland places the excess approached four degrees, and in a few places even exceeded this. The absolutely highest temperature was 85°·0 on the 12th at Ochtertyre; and the lowest, 33°·3 on the 1st at Braemar.

The mean rainfall was 1·80 inch, or 27 per cent. less than the average. Its distribution among the stations was quite peculiar. In Galloway, the Outer Hebrides, Orkney, and Shetland, the rainfall was above the average, but the excess scarcely anywhere exceeded 25 per cent. In all other parts of Scotland the rainfall was less than the average, but the deficiency scarcely exceeded half the average in any district. Nearly all the rain fell from the 1st to the 6th, and from the 17th to the end of the month. Fogs were frequent and widespread during the month, and to such a degree as seldom occurs.

The weather of *July* was characterised by a high barometric pressure, accompanied with a high monthly range; an unusually high mean temperature, with an unusually small mean daily range; a mean humidity a little above the average; a mean rainfall slightly above the average, falling on the average number of days; and wind nearly the average, both as regards direction and force.

The mean barometric pressure was 30·019 inches, being 0·144 inch in excess of the average. The excess was pretty uniformly distributed among the stations, except that it was rather greater in the south than in the north.

The mean temperature was 59°·1, or two degrees above the average, the excess of the days being 1°·4, and of the nights 2°·5, the nights being thus considerably warmer than the days. The excess was greatest to the south of a line drawn from Fraserburgh to Islay, amounting to from two and

Digitized by Google

a half to three degrees; on the other hand, in the west, from Cape Wrath to Wigtownshire, it was only a degree and a half, and in the neighbourhood of Skye it was less than a degree. The absolutely highest temperature was 84°·8 on the 31st at Dundee Harbour, and the lowest 37°·0 on the 5th at Braemar.

The mean rainfall was 3·46 inches, or 9 per cent. above the average. Its distribution over the country was extremely irregular, being above the average in Ross-shire, the counties immediately south of the Moray Firth, and the counties of Argyll, Bute, Renfrew, Dumbarton, Stirling, West and Mid Lothian, and Berwick. The greatest excesses were in percentages—86 at Duns Castle, 58 at Haddo House and Poltalloch, and fully 30 at a large number of stations. On the other hand, it was under the average in the Outer Hebrides, Galloway, East Lothian, Forfar, Kincardine, Inverness, and Caithness. Over large breadths the deficiency was a fourth to half the average.

The weather of *August* was characterised by an extraordinarily high mean barometric pressure, higher indeed than any previously recorded by the Society for this month, accompanied by one of the lowest monthly ranges yet observed; a mean temperature, the highest yet observed for August, with a mean daily range not exceeded by any previous August; a mean humidity decidedly under the average; a mean rainfall less than any previous August except 1880 and 1869, falling only on 8 days, smaller than any August except that of 1880 when the number of days was only 6; and a four days' excess of easterly winds, blowing with a force a good deal under the average.

The mean barometric pressure was 30·069 inches, or 0·218 inch in excess of the average. The excess was a little greater at southern and western stations than at northern and eastern stations, resulting in an excess of easterly winds which rapidly increased in temperature as they advanced from east to west over Scotland, owing to the drier, clearer air and strong sunshine accompanying them.

The mean temperature was 60°·1, or 3°·5 above the average, the days being 5°·2, and the nights only 1°·8 above the average. This is the highest mean temperature yet recorded in Scotland for this month, and it was occasioned by the strongly marked anti-cyclonic character of the weather which prevailed. Of the east coast stations on the coast from the Moray Firth to the Firth of Tay, the mean excess of temperature was less than one degree; at western, but more particularly inland situations, the excess was fully four degrees. The absolutely highest temperature was 88°·8 on the 1st at Dundee Harbour, and the lowest, 34°·5 on the 10th at Braemar.

The mean rainfall was 1·34 inch, or 64 per cent. under the average. At every station the rainfall was light, and over considerable breadths the amount did not exceed a fifth part of the average rainfall. Nearly the whole rainfall of the month occurred after the 25th, on which thunderstorms occurred at many places.

The weather of *September* was characterised by a low barometric pressure, with a monthly range a little less than the average; a mean temperature nearly a degree under the average; with a mean daily range much in excess of the average; a mean humidity a good deal under the average; a mean rainfall, considerably above the average, falling on 21 days. This large number of days has been only once exceeded in this month, viz., in 1872, when the days of rain were 22; and a seven days' excess of west-north-westerly winds, blowing with a force much above the average.

Digitized by Google

The mean barometric pressure was 29·713 inches, or 0·131 inch less than the average. Mean pressures were, to a much greater extent, under the average at eastern and northern than at western and southern stations. Thus they were respectively below their averages—0·200 inch at North Unst, 0·183 inch in Berwickshire, and 0·106 inch in Islay. Hence gradients were formed for the westerly and north-westerly winds which so greatly prevailed, and as the gradients were frequently steep, the winds were considerably above their average in force. Further, the Daily Weather Reports show that on 21 of the 30 days of the month cyclones were to the eastward of Scotland, resulting in these strong north-westerly winds.

The mean temperature was 51°·9, or 0°·9 under the average, the days being 0°·2, and the nights 1°·6 under the average. The amount of the diminution of temperature was, on the whole, uniformly spread over Scotland. The absolutely highest temperature was 79°·0 on the 6th at Cargen, and the lowest, 24°·0 on the 28th at Drumlanrig.

The mean rainfall was 4·59 inches, or 30 per cent. above the average. Its distribution was very unequal, being under the average in the counties of Kirkcudbright, Dumfries, Fife, and E. Berwick, but the deficiency was in all cases small. Over the whole of the rest of Scotland it was above the average, notably over the west from Mull to Orkney, being considerably more than double the average at individual stations in Orkney, Caithness, and the Outer Hebrides. To the south of the Grampians, except at one or two places, the excess did not amount to one-fourth the average of the place. The daily maps of rainfall show that September was very emphatically a wet month over Scotland, with the singular peculiarity that in comparatively few cases did the amount of the daily rainfall exceed one inch.

The weather of *October* was characterised by a rather high barometric pressure, with an unusually low monthly range for the season; a mean temperature very considerably above the average, with a mean daily range not hitherto exceeded in October: a humidity greatly under the average; and three days' excess of west-south-westerly winds, blowing with the average force.

The mean barometric pressure was 29·937 inches, or 0·131 inch above the average. The excess was much greater in the south than in the north,

TABLE XL.—Monthly Mortality and Mean Temperature in Scotland during 1899, compared with the Mean of the Ten Years 1881-1890.

	YEAR 1899.			1881–1890.

Digitized by Google

being 0·180 inch on the Solway, whereas at North Unst pressure was slightly under the average. On the other hand, the monthly range was greatly in excess in the north as compared with the south. The type of weather for the month was strongly anticyclonic.

The mean temperature was 47°·8, or 1°·4 above the average, the mean of the days being 2°·6, and of the nights 0°·2 above the average. Thus the higher temperature was almost wholly due to the greater warmth of the days, owing to the dry, clear atmosphere and strong sunshine accompanying the anticyclones. The excess of temperature was evenly distributed over the different districts. The absolutely highest temperature was 76°·2 on the 19th at Lairg, and the lowest 20°·0 on the 15th at Stobo Castle.

The mean rainfall was 3·10 inches, or 23 per cent. under the average. It was under the average in the various districts, except at a comparatively small number of isolated stations in Shetland, Orkney, the Outer Hebrides, and in central districts, where it was above the average. The deficiency was greater in the east from the Tweed to the Dornoch Firth, amounting only to about a fourth of the average of the month at Peterhead, Logie Coldstone, Aberdeen, Lednathie, Montrose, and Arbroath. Among the stations the greatest excess was 22 per cent. at Fort William, and a like excess is reported from the top of Ben Nevis. The greater part of the rain fell from the 1st to the 4th, 10th to 13th, and 25th to 31st. Little or no rain fell from the 15th to the 23rd.

TABLE XLI.—Meteorology of Scotland for 1899, deduced from Observations made at 67 Stations of the Meteorological Society of Scotland, the particulars for each of the Stations having been published in the Quarterly Reports of the Registrar-General; also the Number of Births, Deaths, and Marriages registered during each Month of the Year 1899.

The weather of *November* was characterised by a high mean barometric pressure, with a correspondingly large monthly range; a mean temperature higher than any previously recorded for November, with a mean daily range slightly above the average; a mean humidity very much under the average; a mean rainfall greatly above the average, falling on two days more than the average; an extraordinary excess of west-south-westerly winds, blowing with a force only exceeded twice since 1856, *viz.*, in November 1881 and 1888, when it equalled respectively 3·71 and 4·77 lbs. to the square foot.

The mean barometric pressure was 29·908 inches, or 0·087 inch above the average. The distribution of pressure was very anomalous, being 0·171 inch above the average on the Solway, whereas in the north of Shetland it was 0·105 inch under the average; and pressure was also higher at eastern than at western stations in the same latitudes. Thus steep barometric gradients were formed for west-south-westerly winds of unusual strength.

The mean temperature was 46°·4, or 5°·8 above the average. As regards Edinburgh, where temperature has been observed since 1763, this is absolutely the highest November mean temperature that has occurred. The mean of the days was 5°·9, and of the nights 5°·6 above the average, being thus equably distributed between the days and the nights. The excess was least in the north, and greatest in strictly inland situations, being 3°·0 at North Unst and 6°·6 at Ochtertyre, near Crieff. The absolutely highest temperature was 63°·3 on the 4th at Fort William, and the lowest 21°·0 on the 18th at Stobo Castle.

The mean rainfall was 4·85 inches, or 27 per cent. above the average. At places in the extreme south-west from Islay to Wigtownshire, and over a somewhat broad strip from the east coast inland and stretching from the Tweed to the Pentland Firth, the rainfall was markedly under the average. Over all the rest of Scotland, particularly inland situations, it was markedly

above the average. In this case the position of Ireland to west sheltered the south-west of Scotland from the violence of the west-south-westerly rains; the eastern stations being similarly sheltered by the mountainous regions to the west. The rain fell mostly during the first fortnight, very heavy falls occurring on the 3rd. In the west much rain fell during the last week of the month, but at eastern stations the fall during the last fortnight was small.

The weather of *December* was characterised by a mean barometric pressure only a little above the average, with an unusually large monthly range; a mean temperature greatly under the average, the mean daily range being all but the average; a rather low mean humidity; a mean rainfall slightly above the average, falling on very nearly the usual number of days for December; and a very large excess of south-easterly winds, blowing with the average for the month.

The mean barometric pressure was 29·811 inches, or 0·020 inch in excess of the average. In the west from Cape Wrath to the Solway pressures were under the average, the greatest deficiency, 0·037 inch, being in the county of Wigtown; whereas over the whole of the east from north to south pressures were above the average, the greatest excess being 0·150 inch in Shetland. Gradients were thus formed for the seven days' excess of winds from east, south-east, and south which prevailed.

The mean temperature was 35°·6, or 2°·2 less than the average, the deficiency being equably distributed between the days and the nights. The greatest deficiency was at places south of the Caledonian Canal, more particularly at places in inland and eastern situations, where in several cases it amounted to 5°·0; and least at coast stations in the west from Stornoway to the Mull of Kintyre, where it was less than one degree. The absolutely highest temperature was 56°·2 on the 1st at Loanhead; and the lowest, 0°·9 on the 14th at Glenlee.

The mean rainfall was 4·16 inches, exceeding the average by only two-tenths of an inch. Its distribution over the country was remarkably striking, being above the average over the whole of the east for a considerable way inland, and at coast stations in the west from the Butt of Lewis so the Mull of Galloway. The greatest excess was on the shores of the Moray Firth from Cromarty to Gordon Castle, where it amounted to double the average fall, and in the county of Wigtown and the extreme south of Argyll, where the excess was 80 per cent. The rain fell principally during the first eight and last twelve days of the month. Thunder and lightning were entirely absent.

Tables XL. and XLI. present in a condensed form some facts respecting the meteorological conditions of each month and the monthly mortality in Scotland during 1899. In the former Table we have the actual number of deaths and the mean temperature for each month, and in the last two columns there is given for the sake of comparison similar details founded upon observations of the ten years 1881-1890, and on comparing these we find the lowest mean temperature during the year under review occurred during January, February, and December, the first and last of them being under those for the decennial period. The highest temperature of the year occurred during July and August, in both of which it is considerably above the mean for the same as shown during the ten years. The mean temperature for the year is above that for the longer period by 1°·1.

From Table XLI. it may be observed that throughout Scotland the death-rate was at its maximum during the coldest and most inclement months of the year, inasmuch as 10·15 per cent. of the deaths were registered during February, 9·51 per cent. during March, 9·09 per cent. during January, and 8·64 per cent. during December, the rate in the other months being 8·51 per cent. during May, 8·38 per cent. during August, 8·21 per cent. during April, 8·64 per cent. during September, 7·74 per cent. during June, 7·34 per cent. during October, 7·28 per cent. during November, and 7·11 per cent. during July.

TABLE XLIV.—Monthly Deaths at Four Periods of Life in Eight of the Principal Towns of Scotland during the Year 1899, and Proportion at each Age in every Hundred Deaths per Month.

Table XLII. is made up from information obtained regarding eight of the Principal Towns of Scotland, and indicates the connection between certain atmospheric phenomena and the mortality from certain diseases and classes of disease. Miasmatic diseases generally were most fatal during the early months of the year, but were again decidedly increasing as causes of death during November and December. Among the Miasmatics noted there is a single death from Small-pox in these towns, and which occurred in Glasgow and is registered during the month of June. Measles as a cause of death is most in evidence during March, November, and December, least so during August, September, and October. The largest number of deaths from Scarlet Fever (48) are registered during January, the fewest (20) during March and April. Hooping Cough was by far most fatal during the first three months of the year, but was again increasing during November and December; the minimum of deaths from this disease occurred during September and October. Diphtheria was the registered cause of 39 deaths in those towns during January and of 30 during November, the smallest number being 12 during July and the same during August, the mortality on the whole being greatest at each end of the year, least during the months of summer. Deaths from Fevers (chiefly Enteric or Typhoid) were most marked during the autumnal months, 49 occurring during September and 51 during October. April, May, and June are the months in which the fewest deaths from Fevers were registered.

Diarrhœal mortality always closely attends upon a high rise of the thermometer and we accordingly find the largest number of such deaths 113 being registered in July, 321 in August, and 361 in September, months in which the temperature was at its maximum and following upon a warm June. They were at their minimum during the colder months generally.

Phthisis or Consumption is as a rule a chronic disease and perhaps not so specially affected by climatic conditions as to hasten the end, and it will be seen how during each month many deaths are registered from it, but on the whole perhaps the earlier months show a greater mortality than the others from this fell disease.

TABLE XLV.—Months equalised to 31 Days, and Deaths at each Age corrected thereto, in order to show the relative Mortality at each Age in Eight of the Principal Towns during each Month of the Year 1899.

MONTHS.	Relative Number of Deaths in 1899.					Monthly Deaths proportioned to 1000 per Month or 12,000 per annum.

The more acute diseases of the Respiratory Organs are particularly influenced by weather conditions, and are as seen much more fatal during the months of winter and spring than during those of summer and autumn; the largest number of deaths from Pneumonia and Bronchitis are during January, February, March, April, November, and December. Very much the same may be seen from the Table to hold in the case of diseases of the Heart and Brain.

Tables XLIV. and XLV. are intended to indicate the comparative mortality at four periods of life during the successive months of 1899 in eight of the Principal Towns of Scotland.

The deaths of children (0-5 years) are registered in greatest numbers during the early and later months of the year, when Zymotics were prevalent and Pulmonary affections fatal.

Among adolescents (5-20 years) the same holds, with, in addition, a considerable mortality during the months of May and June, when Phthisis was the cause of many deaths.

Adults (20-60 years) suffered decidedly most severely during the months of January, February, March, and December—those months when deaths from Pulmonary diseases generally were numerous.

Among the aged (60 and above) the mortality was at its maximum during the colder and most inclement months at either end of the year, when, as may be readily supposed, feeble and damaged organs generally, as Heart, Lungs, and Brain, easily break down.

I have the honour to be,

SIR,

Your most obedient Servant,

R. J. BLAIR CUNYNGHAME, M.D.

GENERAL REGISTRY OFFICE OF BIRTHS, &c.,
EDINBURGH, *6th September* 1901.

N.B.—Districts containing Parliamentary and Royal Burghs are printed in capitals, thus:—EDINBURGH. Districts containing Towns of 2000 Inhabitants and upwards are printed in small capitals, thus:—CARLUKE.

An asterisk "*" is prefixed to those Districts which have different names from the Parishes in which they are situated, or which comprise more, or parts of more, than one Parish. The component parts of these Districts will be found at page 474.

A dagger "†" is prefixed to those Districts which consist of only a part of the civil Parish of the same name.

Creich (Fife), 418

* The actual number of Districts is 1073—many Parishes and Burghs having been divided into two or more Districts for the purpose of Registration. Thus Edinburgh and Glasgow, to each of which only a single number is assigned in the Tables, consist of 6 and 14 Districts respectively. In forming the alphabetical arrangement the principle adopted has been to place *compound* names in the order in which they are pronounced.

REPORT.

TO THE RIGHT HON.

LORD BALFOUR OF BURLEIGH, K.T.,

His Majesty's Secretary for Scotland.

GENERAL REGISTRY OFFICE OF BIRTHS, ETC.
EDINBURGH, *7th March* 1901.

MY LORD,

I have now the honour to submit to you, in accordance with the requirements of the Scottish Registration Act (17 & 18 Vict. cap. 80), a General Abstract of the Births, Deaths, and Marriages registered in Scotland during the year 1900, drawn up in the usual form, with a view to its being laid before Parliament.

I have likewise the honour to submit to you, in accordance with Section 19 of the Vaccination Act (26 & 27 Vict. cap. 108), the Thirty-sixth Annual Report on Vaccination, which includes all the usual details relative to children whose Births were registered in Scotland during the year 1899.

I have the honour to be,

MY LORD,

Your most obedient Servant,

STAIR AGNEW,
Registrar-General.

REPORT TO THE REGISTRAR-GENERAL.

By R. J. Blair Cunynghame, M.D., F.R.S.E.

Sir,

I beg herewith to submit the Report containing the usual details as to the Births, Deaths, and Marriages registered throughout Scotland during the year 1900, in the 1072 Registration Districts into which it is divided. There is also submitted the Thirty-sixth Report on Vaccination, in which all the available information is given in respect to the working of the Scottish Vaccination Act, and especially in relation to the vaccination of children born in Scotland during 1899.

Table I.—Population estimated to the middle of each year, with the Number of Births, Deaths, and Marriages registered in Scotland during each of the Years 1855 to 1900, and their Proportion to the Population; also the Excess of Births over Deaths, the Number of Illegitimate Births, and their Proportion to the Total Births.

Year	Estimated Population	Births.		Deaths.	Marriages.	Excess of Births over Deaths.	Percentage to Population.			Per cent. of Illeg. to Total Births.
		Total.	Illegit.				Births.	Deaths.	Marriages.

At the middle of the year under consideration, the estimated population of Scotland was 4,313,993, of these 2,085,349 being males, and 2,228,644 being females.

During the year there were registered 131,355 births, 82,267 deaths, and 32,449 marriages. Hence for every hundred of estimated population there were 3·04 births, 1·91 deaths, and 0·75 marriages. On comparing

these numbers with the corresponding on Tables I. and II., it is seen that the births show a lower proportion than during any year since 1895, the deaths a greater proportion than since the same year, and the marriages a lower proportion than for the last two years, each in accordance with the estimated population.

The excess of births over deaths is 49,088.

BIRTHS.

131,355 births were registered throughout Scotland during 1900, being at the rate of 3·04 per cent., or 304 for every ten thousand of the population: 67,178 of these were males and 64,177 females.

Tables IV. and V. afford information as to the number and proportion of births in the five groups of Registration districts into which Scotland is primarily divided. In the Principal Town districts the registered births amount to 57,098, equivalent to 3·18 in every hundred of the inhabitants residing therein, the males numbering 29,205, the females 27,893; in the Large Town districts the total number is 18,691, or in the proportion of 3·21 per cent. of the inhabitants, the males being 9540, the females 9151; in the Small Town districts the births are 28,457, or 3·14 per cent. of the population, males 14,534, females 13,923; in the Mainland-Rural districts the natal events are 24,531, or in the ratio of 2·70 per cent. of the population, males 12,543, females 11,988; in the Insular-Rural districts the births are 2578, corresponding to 2·14 per cent. of the estimated population, the males numbering 1356, the females 1222. From these proportions the highest birth-rate occurred in the Large Town districts, followed by that in the Principal Town districts, Small Town districts, Mainland-Rural districts, being lowest in the Insular-Rural districts.

Of the total 131,355 births, 8503, or 6·5 per cent. of all, are illegitimate. This rate varies considerably in the five districts, ranging from 8·5 per cent. in the Mainland-Rural districts to 4·9 per cent. in the Large Town districts; in the Principal Town districts being 6·4 per cent., in the Small Town districts 6·0 per cent., and in the Insular-Rural districts 5·5 per cent. of the total births.

TABLE III.—Births, Deaths, and Marriages in each of the Eight Divisions of Scotland during the Year 1900, and their Proportion to the Estimated Population.

The relative frequency of illegitimacy in the various geographical divisions into which the whole country is divided, and in the counties separately, is tabulated on Table VI. Among the former, the highest rate is found to be in the Southern division, where 11·4 per cent. of the total

births during the year were illegitimate, followed by the North-Eastern with 11·1 per cent. of like nature, the Northern division with 7·4 per cent., the East-Midland division with 7·0 per cent., the South-Eastern with 6·5 per cent., the North-Western with 5·8 per cent., the South-Western with 5·3 per cent., and the West-Midland with 4·6 per cent. In the counties the rate varies from 13·2 per cent., the highest, in Wigtown, to 3·5 per cent., the lowest, in Dumbarton. In seven counties the rate is over 10·0 per cent., that in Kirkcudbright being 11·0 per cent., in Dumfries 12·1 per cent., in Elgin 12·2 per cent., in Banff 12·4 per cent., and in Wigtown 13·2 per cent.

Of the total 131,355 births during the year, 67,178 were boys and 64,177 girls, so that for every 100 of the latter sex 104·7 boys were born, this proportion varying but little in the Principal Town, Large Town, Small Town, and Mainland-Rural districts, but being 111·0 to 100 in the Insular-Rural districts. (Table V.)

Births were registered throughout the country in largest numbers during June, when they were at the rate of 381 per diem, followed by April with 378 daily, January with 377, May with 373, March with 372, July with 367, October with 364, August with 361, February with 354, September with 345, November with 324, and December with 320.

DEATHS.

The number of deaths registered throughout Scotland during the year was 82,267, being in the proportion of 1·91 per cent., or 191 in every ten thousand of the population as estimated, and is a higher rate than for any year since 1895.

The mortality-rate varies in each of the five districts, being 205 per ten thousand of the computed population in the Principal Town districts; in the Large Town districts it is 190, in the Small Town districts it is 181, in the Mainland-Rural districts it is 174, and in the Insular-Rural districts it is 179 per ten thousand of the inhabitants of the same.

The average number of daily deaths was greatest in February, 332, followed by January with 274 per diem, March with 268, April with 242, December with 215, November with 213, May with 212, October with 202, June with 194, July with 190, September with 187, the lowest average daily mortality occurring during August, 184.

MARRIAGES.

32,449 marriages were registered in Scotland during the year 1900, being at the rate of 75 for every ten thousand of the population, a somewhat lower rate than that for the two previous years.

The marriage-rate is highest in the Principal Town districts, where it is 93 per ten thousand of the population; in the Large Town districts it is 76, in the Small Town districts it is 68, in the Mainland-Rural districts it is 53, and in the Insular-Rural districts it is 36.

The largest number of marriages was registered during the month of June, followed in decreasing numbers by December, January, July, April, September, October, November, August, February, March, and May with the fewest.

EIGHT OF THE PRINCIPAL TOWNS OF SCOTLAND.

The following remarks are made with reference to events which occurred in Eight of the Principal Towns in Scotland, and are obtained from materials furnished weekly by the Registrars of the following towns, viz., Glasgow, Edinburgh, Dundee, Aberdeen, Leith, Paisley, Greenock, and Perth, and it is believed that facts relating to them will be found to apply to a considerable extent to the country at large.

BIRTHS IN THESE EIGHT TOWNS.

The births registered as occurring in these Eight Towns during the year under review amount to 49,978, being in the ratio of 311 in every ten thousand of their population as estimated. The highest rate was in Greenock, the lowest in Perth. In the former city the rate is 364 per ten thousand of its inhabitants, followed by Aberdeen with a birth-rate of 332, Glasgow coming next with one of 327, Leith with one of 319, Paisley with one of 314, Dundee with one of 281, Edinburgh with one of 269, and Perth with one of 257.

Of the total 49,978 births, 3395, or 6·8 per cent. of the whole, are illegitimate.

In Dundee 8·8 per cent. of the births are of this nature, in Aberdeen it is 8·1 per cent., in Edinburgh it is 7·8 per cent., in Perth it is 7·1 per cent., in Glasgow it is 6·5 per cent., in Paisley it is 4·8 per cent., in Leith it is 4·4 per cent., and in Greenock it is 3·5 per cent.

Table VIII. gives the percentage of illegitimate children born during the year to the possible mothers—*i.e.*, the unmarried females and widows, between 15 and 45 years of age, presumed to be residing in these towns. Thus in Aberdeen there were 1·72 children born out of wedlock to every hundred such possible mothers, in Glasgow 1·57, in Dundee 1·48, in Leith 1·24, in Edinburgh 1·18, in Perth 1·14, in Greenock 1·05, and in Paisley 0·94.

Of the total children born during the year in the Eight Towns, 25,589 were of the male sex and 24,389 of the female, the proportion of boys to girls being as 104·9 is to 100.

DEATHS IN THESE EIGHT TOWNS.

33,368 deaths were registered in these towns during the year, males 16,755, females 16,613, together representing a rate of 208 in every ten thousand of their inhabitants.

Table VIII. indicates the death-rate in each town, that in Perth being 229 per ten thousand of its population, in Glasgow it is 220, in Greenock it is 214, in Paisley it is 205, in Dundee it is 202, in Aberdeen it is 198, in Edinburgh it is 194, and in Leith it is 157. Table IX. allows of a comparison being made between those rates and the corresponding for 1899, and also the mean for a decennium. The rate for the present year shows an increase in the case of Glasgow, Dundee, Aberdeen, Paisley, and Perth, when compared with what it was in these towns last year, a decrease occurring in the others.

Table X. affords some information as to the mortality during the year among young children in these towns. In one column is the percentage of deaths among such children—viz., under five years of age—for each town, and in the next is the percentage of deaths among the same when compared with the total mortality. Thus it is seen that in Glasgow 69 out of every 1000 children presumably alive under five years of age succumbed during the year, in Greenock the number is 64, in Dundee it is 60, in Aberdeen and in Paisley it is 56, in Edinburgh it is 53, in Perth it is 48, and in Leith it is 43. Again, from the last column in the Table it appears that 39·8 per cent. of the total mortality in Glasgow occurred among such young children, in Greenock 37·6 per cent., in Leith 35·4 per cent., in Paisley 35·2 per cent., in Aberdeen 35·1 per cent., in Dundee 34·8 per cent., in Edinburgh 29·0 per cent., and in Perth 23·2 per cent.

Tables XI. and XII. present the rate of mortality due to various classes of disease and to the more important causes of death in each of the Eight Towns, such rate being calculated in the former Table with reference to the estimated population, and in the latter with reference to the total deaths from all causes, allowance being made in all cases for the causes of death not precisely specified.

The percentage of deaths from Zymotic diseases was 0·285 on the total estimated population of the towns, forming 13·75 per cent. of the total mortality occurring therein. Such causes proved fatal to 0·337 per cent. of the population of Glasgow, to 0·320 per cent. of that of Greenock, to 0·313 per cent. of that of Paisley, to 0·271 per cent. of that of Aberdeen, to 0·264 per cent. of that of Perth, to 0·231 per cent. of that of Edinburgh, to 0·219

TABLE X.—Deaths of Children under Five Years of age in each of Eight of the Principal Towns of Scotland during the Year 1900.

Towns.	Estimated Number of Living Children under 5 years in 1900.	Deaths under 5 years of age.	Percentage of Deaths under 5 years.	Percentage of Deaths under 5 years to the Total Deaths.
Glasgow	94,349	6,532	6·92	39·8
Edinburgh	32,419	1,707	5·27	29·0
Dundee	19,615	1,181	6·02	34·8
Aberdeen	17,808	1,005	5·64	35·1
Leith	10,182	436	4·28	35·4
Paisley	10,198	566	5·55	35·2
Greenock	7,653	488	6·38	37·6
Perth	3,416	164	4·80	23·2

Digitized by Google

per cent. of that of Dundee, and to 0·137 per cent. of that of Leith. The percentages of deaths from those same diseases to the total deaths are 15·27 in Glasgow, 15·26 in Paisley, 14·93 in Greenock, 13·73 in Aberdeen, 11·90 in Edinburgh, 11·52 in Perth, 10·83 in Dundee, and 8·73 in Leith.

In Glasgow, out of every hundred deaths 4·40 were due to Hooping Cough, 2·86 to Measles, 2·00 to Diarrhœa and Dysentery, 1·30 to Scarlet Fever, 1·23 to Influenza, 1·13 to Fevers (of which 0·12 are Typhus and 0·98 Enteric), 0·81 to Diphtheria, and 0·26 to Smallpox.

In Edinburgh, the percentage of deaths from Influenza is 2·96, from Measles 2·20, from Diarrhœal affections 1·94, from Diphtheria 1·09, from Hooping Cough 1·04, from Scarlet Fever 0·56, and from Fevers 0·53, of which 0·05 is Typhus and 0·48 Enteric or Typhoid.

In Dundee, Diarrhœal affections are the cause of 3·76 per cent. of the total deaths, Measles is the cause of 1·95 per cent., Influenza of 1·83 per cent., Hooping Cough of 1·15 per cent., Diphtheria of 0·65 per cent., Fevers of 0·36 per cent. (equally divided between Typhus and Enteric), and Scarlet Fever of 0·12 per cent.

In Aberdeen, the percentage of deaths from Hooping Cough is 3·17, from Influenza 2·78, from Diarrhœa and Dysentery 2·64, from Measles 1·97, from Diphtheria 1·02, from Fevers 0·46 (all Enteric), and from Scarlet Fever 0·32.

TABLE XI.—Percentage of Deaths from different Diseases to the Population in each of Eight of the Principal Towns of Scotland during the Year 1900, allowing for the Causes not specified.

DISEASES CAUSING DEATH.	Total Eight Towns.	Glasgow.	Edinburgh.	Dundee.	Aberdeen.	Leith.	Paisley.	Greenock.	Perth.

In Leith, Diarrhœa and Dysentery is the cause of 2·20 per cent. of a l the deaths, Hooping Cough of 1·47 per cent., Measles and Influenza each of 1·39 per cent., Diphtheria of 0·65 per cent., and Fevers (all Typhoid), of 0·24 per cent.

In Paisley, 3·42 per cent. of the deaths is due to Measles, 2·62 per cent. to Diarrhœal affections, 2·30 per cent. to Hooping Cough, 2·12 per cent. to Scarlet Fever, 1·62 per cent. to Influenza, 1·18 per cent. to Fevers (all Enteric), and 0·93 per cent. to Diphtheria.

In Greenock, Hooping Cough is the ascribed cause of 5·72 per cent. of the mortality, Diarrhœa and Dysentery of 2·71 per cent., Diphtheria of 1·78 per cent., Fevers of 1·0 per cent. (0·08 of this Typhus, and 0·93 Enteric), Scarlet Fever and Influenza each of 0·93 per cent., and Measles of 0·70 per cent.

In Perth, in every hundred deaths, 4·13 are due to Hooping Cough, 3·56 to Influenza, 1·00 to Diarrhœa and Dysentery, 0·85 to Diphtheria, 0·71 to Measles, and 0·43 to Fevers, (all being Enteric or Typhoid.)

In the aforesaid Eight Towns collectively there were registered during the year 1057 deaths from Hooping Cough, being at the rate of 3·20 per cent. of the total mortality, and in the proportion of 6·6 in each ten thousand of their inhabitants. Measles caused 798 deaths, or 2·42 per cent. of all deaths, and equal to 4·9 in each ten thousand of population. Diarrhœa and Dysentery caused 750 deaths, 2·27 per cent. of

TABLE XII.—Percentage of Deaths from different Diseases to the Total Deaths in each of Eight of the Principal Towns of Scotland during the Year 1900, allowing for the Causes of Death not specified.

all, and equal to 4·7 per ten thousand inhabitants. To Influenza 594 deaths are ascribed, 1·80 per cent. of the whole, and 3·7 per ten thousand. Scarlet fever caused 302 exits, equal to 0·91 per cent. of all the deaths, and 1·9 in every ten thousand. Diphtheria caused 297 deaths in those towns, or 0·90 per cent. of all, and 1·9 in every ten thousand. Fevers caused 276 deaths, or 0·84 per cent. of all, and 1·7 in each ten thousand of the population, Enteric causing 242 deaths, Typhus 29, Cerebro-Spinal Fever 1, and Simple or Ill-defined 4. From Smallpox this year there are 42 deaths, all in Glasgow, being at the rate of 0·13 per cent. of all deaths in the towns together, and 0·26 per cent. of the deaths in Glasgow alone.

The total number of deaths from diseases of a Zymotic character in the Eight Towns is 4543, and is the cause of 13·75 per cent. of the total mortality, and equal to 28·5 in every ten thousand of their inhabitants. Syphilis causes 145 deaths, Erysipelas 61, and Puerperal Fever 94.

Diseases of a Constitutional nature caused 6355 deaths, or 19·23 per cent. of all the deaths in these towns, and equal to 39·9 per ten thousand of the inhabitants of the same. Rheumatism and Rheumatic Fever caused 170 deaths. Cancer caused 1396, equal to 4·23 per cent. of all, or 8·8 deaths in every ten thousand of population, and most apparent in Edinburgh, Greenock, and Perth. To Phthisis 3117 deaths are due, 9·43 per cent. of the total mortality, and equivalent to 19·6 deaths per ten thousand of the inhabitants, Glasgow, Dundee, and Perth showing the highest rate to population. Tubercular Meningitis caused 535 deaths, Tabes Mesenterica 445, and other forms of Scrofulous disease 370.

From Diseases of the Nervous System there are 3689 deaths, or 11·16 per cent. of all, and equal to 23·2 exits in each ten thousand of the population of the eight towns. The percentage of such deaths to those from all causes was 13·95 in Paisley, 13·61 in Greenock, 13·51 in Perth, 12·04 in Aberdeen, 11·34 in Edinburgh, 11·33 in Dundee, 10·45 in Glasgow, and 9·71 in Leith; the rate per thousand of population being 31·0 in Perth, 29·2 in Greenock, 28·7 in Paisley, 23·8 in Aberdeen, 23·0 in Glasgow, 22·9 in Dundee, 22·0 in Edinburgh, and 15·2 in Leith.

Diseases of the Organs of Circulation account for 2768 deaths, or 8·38 per cent. of all, and at a rate of 17·4 in every ten thousand of the inhabitants. Leith shows a percentage of 10·53 on the gross mortality, followed by Aberdeen with one of 10·31, Edinburgh with one of 10·16, Dundee 9·91, Perth 9·82, Greenock 9·05, Paisley 7·97, and Glasgow 6·82.

To Diseases of the Respiratory Organs (Phthisis excluded) 6862 deaths are due, or 20·77 per cent. of the total mortality, and 43·1 in every ten thousand of the inhabitants. Glasgow stands first with 23·30 per cent. of its total mortality thus accounted for, followed by Dundee with 22·78 per cent., Paisley with 18·06 per cent., Perth with 17·92 per cent., Leith with 17·47 per cent., Aberdeen with 17·39 per cent., Greenock with 17·25 per cent., and Edinburgh with 16·83 per cent. Bronchitis caused 3035 deaths, or 9·19 per cent. of the whole mortality, and 19·1 in every ten thousand of the inhabitants. Pneumonia caused 3139 deaths, 9·50 per cent. of all, and at the rate of 19·7 to population as before. Pleurisy caused 164 deaths, and Croup 54.

From Diseases of the Digestive Organs there are 2325 deaths, being 7·04 per cent. of all, and in the proportion of 14·6 per ten thousand of the inhabitants. Enteritis is the cause of 653 deaths, Peritonitis of 320, Dentition of 188, and Liver Disease of 274.

Digitized by Google

Diseases of the Urinary Organs caused 862 deaths, 2·61 per cent. of all, or 5·3 in every ten thousand of population. Acute Nephritis caused 229 and Bright's Disease 446 of the above.

Premature Birth accounts for 955 deaths, Congenital Malformations for 245, and Old Age for 1254.

Atrophy and Debility are the ascribed cause of 1021 exits, and in 327 cases the cause is not specified or is ill-defined.

Violence caused 1396 deaths, or 4·23 per cent. of the total mortality, and 8·8 for every ten thousand of the population. 1329 of those are due to Accident or Negligence, 6 are Homicidal, and 61 Suicidal. 117 deaths are due to Intemperance.

The Suicides were effected as follows:—Hanging 22, Cut Throat 19, Drowning 8, Shooting 6, Precipitation 2, Poisoning 2, not stated 2.

In the same towns 118 persons died aged 90 years and upwards, 32 being males and 86 females. The eldest were the widow of a master plasterer and the widow of a minister, both aged 99 years. Three females were aged 98, and one male, a shipwright, was aged 97.

MARRIAGES IN THE EIGHT TOWNS.

15,200 marriages were registered in the above during the year, which is at the rate of 95 in every ten thousand of their estimated population. The rate varies in the different towns. Thus it is 101 in like proportion in Glasgow, and 100 in Edinburgh, 77 in Dundee, 94 in Aberdeen, 69 in Leith, 85 in Paisley, 87 in Greenock, and 98 in Perth.

WEATHER AND ITS INFLUENCE ON THE MORTALITY.

The following remarks on the weather of the year are extracted from the Notes made by Dr. Buchan, under the Council of the Scottish Meteorological Society, which appear in the Registrar - General's Monthly Reports:—

January was characterised by a mean barometric pressure a little less than the average, with a very low monthly range; a mean temperature fully a degree above the average, with a mean daily range decidedly under the average; a mean humidity under the average; a mean rainfall much in excess of the average, falling more frequently than the average; winds blowing with nearly the average direction and force.

February was characterised by a very low mean barometric pressure, with a large monthly range; an exceedingly low mean temperature, with a rather large mean daily range; a mean humidity under the average; a mean rainfall above the average, falling on one day less than the average; and four days' excess of northerly and easterly winds.

March was characterised by a very high mean barometric pressure, with a monthly range somewhat under the average; a low mean temperature, with a nearly average mean daily range; a very low mean humidity; a very small rainfall, particularly in the west, falling on four days fewer than the average; and six days excess of north-westerly and north-easterly winds.

April was characterised by a mean barometric pressure a little less

Digitized by Google

than the average, with a monthly range greatly above it; a mean temperature fully a degree above the average, with a mean daily range considerably above it; a mean humidity slightly below the average; a mean rainfall rather under the average, falling on three days more than the average; and six days' excess of westerly winds, blowing with a force considerably above the average.

May was characterised by a mean barometric pressure a little less than the average, with a monthly range considerably more than the average; a mean temperature nearly half a degree above the average, with a mean daily range a little under the average; a rather low mean humidity; a mean rainfall a little under the average, falling on the average number of days; and two days excess of south winds, with a wind force greatly above the average.

June was characterised by a mean barometric pressure below the average, with a monthly range slightly above the average; a mean temperature nearly a degree above the average, with a mean daily range near the average; a mean humidity slightly above the average; a mean rainfall nearly the third of an inch above the average, falling on four days more than usual; and an excess of four days of north-easterly, south-easterly, and southerly, and a defect of four days of south-westerly and westerly winds, with a wind force distinctly below the average.

July was characterised by a mean barometric pressure a little above the average, with a monthly range a little less than the average; a mean temperature greatly above the average, and only once previously exceeded, in 1868, when the mean temperature was 61°·0; a mean daily range of temperature a degree less than the average; a mean humidity slightly above the average; a mean rainfall a little above the average, and falling on five days more than the average.

August was characterised by a mean barometric pressure and monthly range both considerably above the average; a mean temperature a degree less than the average, with a mean daily range much under the average; a mean humidity a little above the average; a mean rainfall largely above the average, falling on the average number of days; and a large excess of northerly and easterly winds.

TABLE XV.—Showing the connection between certain Atmospheric Phenomena, especially Temperature, and the Deaths from certain Diseases and Classes of Diseases in Eight of the Principal Towns of Scotland, during each Month of the Year 1900.

September was characterised by a mean barometric pressure greatly above the average, with a monthly range also considerably above the average; a mean temperature about a degree above the average, accompanied with a very large mean daily range; a mean humidity rather under the average; a mean rainfall a little below the average, falling on the average number of days.

October was characterised by a mean barometric pressure near the average of the month, with a monthly range a good deal under the average; a mean temperature a little under the average, with a mean daily range rather above the average; a mean humidity rather more than the average; a very large mean rainfall, falling on two days more than the average; and five days' excess of west-north-westerly winds, blowing with nearly the average force.

November was characterised by a low mean barometric pressure, with a monthly range a good deal under the average; a mean temperature fully a degree above the average, with a very small mean daily range; a mean humidity which has not been exceeded since 1874; a quite unusual heavy mean rainfall, falling on five days more than the average; and five days' excess of south-easterly winds, of a force much less than the average.

December was characterised by a very low barometric pressure and a rather low monthly range; an almost unprecedentedly high temperature, higher than any recorded since December 1857, with a mean daily range only very slightly under the average; a mean humidity a little less than the average; a quite unusually heavy rainfall, with 25 rainy days, or eight days in excess of the average; a large preponderance of southerly winds, and blowing with a mean force greater than has hitherto been recorded by the Society's observers in December.

By means of Table XIII. a comparison may be made between each month of 1900 and those of the decennial period between 1881-1890 as regards the average temperature and the proportionate mortality experienced throughout Scotland during the above periods. The lowest mean temperature for 1900 was during the months of January, February, and March, and it was during the same months the largest numbers of actual deaths were registered. The smallest number of actual deaths was registered during September. The mean temperature of the year 1900 as compared with that of the ten years indicates a slight advantage in the case of the former, it being a little higher (46·4) than the latter (45°.8), and, on looking at the months separately, we find that the mean temperature in the case of eight of the months of the years under review is above that of the same for the longer period.

Table XIV. gives information on various points deduced from meteorological observations made at 65 stations throughout Scotland, and tabulated month by month.

Table XV. indicates the connection between certain atmospheric conditions and the death-rate from some diseases and classes of diseases in the

TABLE XVII.—Monthly Deaths at Four Periods of Life in Eight of the Principal Towns of Scotland during the Year 1900, and Proportion at each Age in every Hundred Deaths per Month.

Eight Towns. Deaths from Miasmatics generally were registered in larger numbers during the first half than during the latter half of the year. There were 42 deaths from Smallpox during the year, all occurring in Glasgow; 2 of those were registered during April, 2 during May, 4 during June, 7 during July, 3 during August, 4 during September, 7 during October, 4 during November, and 9 during December. Measles was more prevalent from January to July than in the later months of the year, and, after Hooping Cough, was the most prevalent, or at least fatal, disease of a zymotic character during the year; the latter affection caused a larger number of deaths during the late than during the early months. Scarlet Fever as a registered cause of death stood pre-eminently forward in no one special month, while Diphtheria was apparently most marked during the later months of the year, as also is the case with Fevers. Diarrhœa and Dysentery, as usual, show their highest mortality during the late summer and autumnal months.

Phthisis, which claims many lives each month, is specially to be noted as a cause of death during the early months, when the registered mortality from this disease was greatest, being least so during August and the months following. Diseases affecting the Respiratory Organs, especially Bronchitis and Pneumonia, are usually markedly affected by climatic conditions, and we accordingly find the greatest mortality from such to occur during the first three and last two months, which, as seen on Table XIII., are the coldest, while it is at its minimum during the warmer months of July, August, and September. Much the same may be said of deaths due to Disease of the Heart and Blood Vessels, to those due to Disease of the Brain, and to Old Age.

Tables XVII. and XVIII. are so arranged as to indicate the relative monthly mortality at different ages among the inhabitants of the Eight Towns. Thus with Children (0 to 5 years) the heaviest mortality occurred during the months of February, October, and November, the lightest during May, June, and July.

Among Adolescents (5 to 20 years) the deaths were more numerous during the first six months of the year than during the last six.

In the case of Adults (20 to 60 years) the deaths were registered most decidedly in larger numbers during the first four months of the year than during any other month, their minimum occurring during July, August, and September.

Aged persons or those over 60 years succumbed in largest numbers during just the same months as in the case of the last, those months in which climatic conditions were most severe and tell upon those exposed to them while in the prosecution of their daily work, and the same in the case of the old and feeble, who, although not perhaps so much directly exposed to cold and wet, are still little able to withstand their effects.

The general mortality among the total population of these eight towns during 1900 was heaviest during February, followed in gradually diminishing numbers by January, March, April, November, December, May, October, July, June, September, and August.

REPORT

ON THE

VACCINATION OF CHILDREN

BORN IN SCOTLAND IN 1899.

From the Vaccination Returns for the year 1899 it appears that of the 130,794 children whose births were recorded in Scotland, 109,261, or 83·537 per cent., were successfully vaccinated. In 2942 cases certificates of postponement were granted, being at the rate of 2·249 per cent. of the

whole births; 597 children, or 0·457 per cent., were stated to have been insusceptible of vaccination in consequence of constitutional peculiarity; and 355, or 0·271 per cent., from having been successfully vaccinated, but by persons who were not qualified to grant certificates to that effect. None of the children born were insusceptible from having had smallpox. 13,719 children died before vaccination, constituting 10·489 per cent. of the total births, and 3920, or 2·997 per cent., were removed from the district in which they were born, or from some other cause were unaccounted for. It thus appears that for the year 1899 the number of children successfully vaccinated is below the average for the previous ten years, while in all other cases the numbers are above the average.

In Table XX. is found a statement of the number of living children, those who died before vaccination being omitted, and the various proportions to the total number. Hence it is seen that of the 117,075 children alive at the age of six months, 109,261, or 93·326 per cent., were successfully vaccinated; in 2942 cases vaccination was for some reason postponed, being at the rate of 2·513 per cent. of the total number alive; 597 children, or 0·510 per cent., were constitutionally insusceptible; 355, or 0·303 per cent., were insusceptible from having been previously successfully vaccinated; and 3920 children, or 3·348 per cent., were removed from the district of birth, or from other causes were unaccounted for.

Table XXI. shows the number of deaths from Smallpox in Scotland during each year from 1855 to 1898, the numbers given for 1899 and 1900 being those which occurred in eight of the Principal Towns only.

TABLE XX.—Vaccinations in Scotland, 1889–1899, deducting from the Births those who died before they could be Vaccinated, and giving the Proportion of the Vaccinated to the surviving Births of each year.

N.B.—Districts containing Parliamentary and Royal Burghs are printed in capitals, thus—EDINBURGH. Districts containing Towns of 2000 Inhabitants and upwards are printed in small capitals thus—CARLUKE.
An asterisk "*" is prefixed to those Districts which have different names from the Parishes in which they are situated, or which comprise more, or parts of more than one Parish, and the component parts of these Districts will be found on page 56. A dagger "†" is prefixed to those Districts which consist of only a part of the Civil Parish of the same name.
‡ Vaccination returns not received.

APPENDIX.

VACCINATION, 1899.

EXTRACTS FROM THE REGISTRARS' NOTES RELATIVE TO THE WORKING OF THE VACCINATION ACT.

I. NORTHERN DIVISION.

1. SHETLAND.

2. DELTING.—The three cases certified "insusceptible" were vaccinated by the late Medical Officer, who left the parish without certifying them, and they have now been certified by his successor. Of the seven unaccounted for, some were vaccinated as above, but have not yet been seen by the newly appointed Medical Officer.

5. (2) BURRA ISLES.—With regard to the number entered under column 7, the children are all living in the District, but vaccination has not been completed on account of the following peculiar circumstances: — In the month of August Dr. Forbes visited and vaccinated as usual, but died the same evening on his way back. Some of the cases proved unsuccessful, others successful, but not yet examined, while others again had to be returned as insusceptible. A Medical Officer has been recently appointed.

10. (2) WHITENESS AND WEISDALE.—The Medical Officer of the parish (Dr. Forbes) gave intimation to vaccinate the children on a certain date, but died suddenly the day before. A successor has only recently been appointed, and hence the large number yet unvaccinated.

12. (3) PAPA STOUR.—It is understood that three of the children noted in column 2 have been successfully vaccinated, but owing to stress of weather and other causes the Medical Officer has been unable to again visit the island and grant the requisite certificates.

II. NORTH-WESTERN DIVISION.

5. ROSS AND CROMARTY.

Insular.

89. UIG.—Postponed cases have been almost all vaccinated. although not yet certified.

6. INVERNESS.

Mainland.

92b. CANNICH.—The number in column 7 includes one illegitimate child who cannot be found, and two who have been vaccinated, but certificates not yet received. The other two cases are to be dealt with.

97. (1) GLENELG.—The three cases entered in column 7 have all been vaccinated, but certificates not yet received.

98. INVERNESS. — Defaulting parents were prosecuted in four cases, with the result that a small fine was imposed in each case, but the parties have continued their refusal.

99. (1) GLENGARRY.—The two "removed from Distrfct before vaccinntion" were children of men employed in connection with the Invergarry and Fort-Augustus Railway.

99. (2) LOCHABER.—Of the three entered in column 7, two were the children of navvies, and one of a travelling tinker. Owing to the great extent of the District, it is not always possible to get all the vaccinations done within the six months.

Insular.

111. (1) NORTH HARRIS.—An epidemic of measles having broken out in October, and being prevalent in November and the greater part of December, accounts for the unsatisfactory state of vaccination.

111. (3) BERNERA. — The children have all been vaccinated, but as the Vaccinator had to come from North Harris they have not been seen by him since.

113. NORTH UIST. — Hooping-cough and measles have been in the parish for several months.

117. (2) SOUTH SNIZORT.—Of the two children unaccounted for, one was removed from the District and has not yet been traced; the other is in a remote part of the district, and the mother could not meet the Vaccinator owing to the severity of the weather.

118. (1) BENBECULA.—There was no Medical Officer in the District for several months and hence the large number of cases unaccounted for.

III. NORTH-EASTERN DIVISION.

10. ABERDEEN.

168. (2) ST. MACHAR (ABERDEEN). — Of the thirty-four cases entered in column 7, seven have been reported on as "not found," six are under consideration of the Parish Council, and twenty-one were postponed to dates prior to 31st December 1900.

IV. EAST MIDLAND DIVISION.

14. FIFE.

411. BURNTISLAND.—The migratory character of the families of the labouring class employed on the new dock works has rendered it extremely difficult to secure the return of the vaccination certificates.

VII. SOUTH-EASTERN DIVISION.

25. EDINBURGH.

677. COLINTON.—The sixteen children who are all entered as being removed from the parish before vaccination were born in Craiglockhart Poorhouse, all trace of them being lost.

VIII. SOUTHERN DIVISION.

32. KIRKCUDBRIGHT.

884. URR.—The entry under column 7 refer to a child born in a caravan, and which cannot be traced.

CONSTITUTION OF THE DISTRICTS DISTINGUISHED IN THE PRECEDING TABLES BY AN ASTERISK (*).

No.	Districts.	Component Parts (Parishes).
13	Birsay	Part of Harray and Birsay.
14	Deerness	Part of St Andrews.
18	Harray	Part of Harray and Birsay.
22	North Ronaldshay	Part of Cross and Burness.
26	Sanday	Lady, and part of Cross and Burness.
37b	Keiss	Parts of Canisbay and Wick.
58	Applecross	(1) Part of Applecross; (2) Remainder of Applecross and part of Gairloch.
59b	Carnoch	Parts of Contin and Urray.
86b	Carloway	Parts of Barvas and Uig.
87	Lochs	Lochs, and part of Uig.
91b	Arisaig	Part of Arisaig and Moidart.
92b	Cannich	Parts of Kilmorack and Kiltarlity and Convinth.
112	Kilmuir	(1) Part of Kilmuir; (2) Remainder of Kilmuir, and part of Snizort
185	Elgin	Elgin, and parts of New Spynie, and St Andrews-Lhanbryde.
152	Enzie	Parts of Bellie and Rathven.
155b	Glenrinnes	Parts of Aberlour and Mortlach.
167	Seafield	Parts of Cullen and Rathven.
171b	Ardallie	Parts of Cruden, Ellon, Longside, and Old Deer.
210b	Kinninmonth	Parts of Crimond, Longside, Lonmay, Old Deer, and Strichen.
217	Logie Coldstone and Cromar	Logie Coldstone, and part of Glenmuick, Tullich, and Glengairn.
222b	Millbrex	Parts of Fyvie and Monquhitter.
227b	New Pitsligo	Parts of Aberdour, New Deer, Strichen, and Tyrie.
231	Peterculter	(1) Parts of City Parish of Aberdeen and Peterculter; (2) Remainder of Peterculter.
237b	Savoch	Parts of Ellon, New Deer, Old Deer, and Tarves.
249b	Ythan Wells	Parts of Auchterless and Forgue.
266	Nigg	Part of City Parish of Aberdeen and Nigg.
282	Dundee	Dundee, and part of Liff, Benvie, and Invergowrie.
294b	Kilry	Parts of Glenisla and Lintrathen.
324	Aberfeldy	Parts of Dull, Kenmore, and Logierait.
330	Auchtergaven	Parts of Auchtergaven and Logiealmond.
331	Balquhidder	Balquhidder, and part of Comrie.
344	Dowally	Part of Dunkeld and Dowally.
349	Dunkeld	Part of Dunkeld and Dowally.
355b	Foss	Parts of Blair-Athol and Dull.
361	Killin	Parts of Kenmore and Killin.
375	Logiealmond	Parts of Logiealmond, Little Dunkeld, and Methven.
379	Meigle	Meigle, and part of Coupar-Angus.
386b	Persie	Parts of Alyth, Blairgowrie, and Kirkmichael.
387	Perth	Perth, and part of Kinnoull.
393b	Stanley	Parts of Auchtergaven, Kinclaven, and Redgorton.
394b	Strathfillan	Part of Killin.
394c	Tenandry	Parts of Blair-Athol and Moulin.
402	Anstruther-Easter	Anstruther-Easter, and part of Kilrenny.
417	Crail	Part of Crail and May Island.
423	Dunbog	Dunbog, and part of Flisk.
425	Dunino	Dunino, and part of Crail
442	Kirkcaldy and Abbotshall	Kirkcaldy, Abbotshall, and part of Kinghorn.
481b	Grangemouth	Parts of Bothkennar, Falkirk, and Polmont.
488	St. Ninians,	St. Ninians, and part of Stirling.
496	Dumbarton	Dumbarton, and part of Cardross.
505	Ardnamurchan,	Parts of Ardnamurchan, and Arisaig and Moidart.
506	Ballachulish, etc.	Parts of Kilmallie, and Ardgour.
509	Cumlodden and Minard	Parts of Glassary and Glenaray.
513	Inveraray	Inveraray, and part of Glenaray.
515	Kilbrandon and Kilchattan	Kilbrandon and Kilchattan, and part of Jura.
517	Kilchrenan, etc.	(1) Parts of Kilchrenan and Dalavich, and Glenorchy and Inishail; (2) Remainder of Kilchrenan and Dalavich.
520	Kilmallie,	Parts of Kilmallie, and Ardgour.
525	Lismore	Lismore and Appin, and part of Ardgour.
526	Lochgilphead	Parts of Glassary and South Knapdale.
529	Muckairn	Parts of Ardchattan and Muckairn, and Glenorchy and Inishail.
535	Tarbert	Parts of Kilcalmonell, Saddell and Skipness, and South Knapdale.
536	Bowmore (or Kilarrow)	Part of Kilarrow and Kilmeny.
543	Kilmeny	Part of Kilarrow and Kilmeny.
545	Kinlochspelvie	Part of Pennygown and Torosay.
547	Portnahaven	Part of Kilchoman.
548	Salen	Parts of Kilninian and Kilmore, and Pennygown and Torosay.
549	Tobermory	Part of Kilninian and Kilmore.
550	Torosay	Part of Pennygown and Torosay.
556	Lochranza	Parts of Kilbride and Kilmory.
559b	Bridge-of-Weir,	Parts of Houston and Killellan, and Kilbarchan.
572	Neilston	(1) Part of Neilston; (2) Remainder of Neilston, and part of Paisley.
576	Ardrossan	(1) Parts of Ardrossan and West Kilbride; (2) Remainder of Ardrossan.
584b	Crosshill	Parts of Kirkmichael, Kirkoswald, and Maybole.
595	Irvine	Irvine, and part of Dundonald.
61[illegible]b	Patna	Parts of Dalmellington, Dalrymple, Kirkmichael, and Straiton.
6[illegible]6b	Calderhead	Parts of Cambusnethan and Shotts.
644	Glasgow	City of Glasgow, Gorbals, and parts of Barony and Govan.
685	Edinburgh	City Parish of Edinburgh, and parts of Duddingston and Liberton.

* The actual number of Districts is 1072—many Parishes and Burghs having been divided into two or more Districts for the purpose of Registration. Thus Edinburgh and Glasgow, to each of which only a single number is assigned in the Tables, consist of 6 and 14 Districts respectively. In forming the alphabetical arrangement the principle adopted has been to place *compound* names in the order in which they are pronounced.
